

Welcome

Welcome to my Home Page at the Department of Electrical and Computer Engineering, California State University, Chico. I have been at the Department since August 1989 and have been involved with development and teaching of courses in the computer engineering area. My area of teaching, laboratory development and research, have been in digital systems, applications of digital signal processing. I also have an interest in engineering student and Faculty exchange programs among U.S., Canada, and Mexican universities, having recently been a Co-Principal Investigator on a U.S. government grant(FIPSE) to develop engineering student mobility.

I am currently the coordinator of the computer engineering program. So, whether you are a prospective computer engineering student, a current student, Alumni, industry representative or fellow academician interested in our computer engineering students or program, I encourage you to contact me at arichardson@csuchico.edu. I will be glad to help with any specific inquiries you might have about our computer engineering courses. I also encourage you to contact the Chairman of our department, Dr. Adel Ghandakly.
