Office: OCNL 308

My interests include Robotics and Power Systems, particularly the area of power generation through green methods such as solar. I teach courses in Digital Systems Design (EECE 344) and Introduction to Network Engineering (EECE 455). I previously have taught the Micromouse Design and Competition course (formerly ECE 191) and the lab portions of Linear Circuits (EECE 211L), Logic Design and Fundamentals (EECE 144) and Digital Systems Design (EECE 344) courses here at Chico State.
