References

This special section consists of two subsections: sample formats and general style. The first presents examples of most of the reference types that arise in Computer Society publications. The second delineates the policies and style principles underlying the formats. For Transactions, see "Transactions Department References" (compiled January 2000).

Sample formats

**Article in a collection**

**Article in a conference proceedings**

In general, delete prepositions in conference titles where the meaning is clear without them (see the Abbreviations section). Use the ordinal symbol (2nd, 14th, 23rd) for annual conferences. If available, include the conference initialism in parentheses—for example, (ICDE 98)—following the abbreviated name of the conference.

**Article in a journal or magazine**

Use lowercase for vol. and no. Page numbers through 9999 do not require a comma.

**Book**

**Book series**

Note: According to CMS 17.91, if the book can be located without it, the series title can be omitted to save space.

**CD-ROM**

Place the term "CD-ROM" following the publication's title and preceding the publisher's name. For example, the format for a book that is available on CD-ROM is

**Dissertation or thesis**

**Electronic publication**

**Online-only publication**

**Web site**

**URL formatting and punctuation**

Verify URLs by copying and pasting them into your browser. Some addresses don't start with http://—other protocols are also legitimate, for example, ftp:—and some addresses don't need or even won't work with www. Some publications omit the http:// if the URL starts with www.

Be sure to include all punctuation exactly as supplied (hyphens and tildes, in particular, are very common in Web addresses).

If a URL must run across more than one line, follow these guidelines:

- Break only after a forward slash or a "dot" (period).
- Do not split the double slash..
• Do not introduce hyphens to break words (be very careful about this as Word may try to hyphenate automatically).

• Separating the extension (for example, the html at the end) is discouraged.

Some URL examples using http://www.web-pac.com/mall/pacific/start.html:

**Acceptable:**

http://

www.web-pac.com/mall/pacific/start.html

**Not acceptable:**

http://

www.web-pac.com/mall/pacific/start.html

**Discouraged:**

**Newsletter**

**Non-English source**

Including original title:

Original title unprintable:

**Patent**

With information about patentee

Without patentee information

**Pending publication**

Include as much information as possible about the article or paper, including the name of the publication and date if known.

**Personal communication and unpublished materials**

These are usually not referenced because they are not available to the reader. Authors who insist on attributing material obtained through personal communication should identify the source of the information in the main text (for example, *As Maria Youngblood stated during a conference panel, ...*).

**Special issue**

**Standard**

**IETF working draft**

L. Martini et al., *Transport of Layer 2 Frames over MPLS*, Internet draft, work in progress, Feb.

Note: Per IETF guidelines, references to working drafts should not include URLs because they expire after six months; use "work in progress" instead.

Industry specification

MPEG specification

RFC

W3C note

W3C recommendation

Technical memo, technical report, technical or user manual

Include the department name for technical memos, technical reports, and other material that may not be indexed in a company-wide or university-wide library or by an abstracting service.

Technical memo

Technical report with report number

Technical report without report number

Technical or user manual

General style

Author names

Use each author's initials and last name. Leave no space between initials, but do leave a space between the period following the last initial and the first letter of the last name: E.F. Codd.

If an entry has more than three authors, use the first author's name and follow it with "et al.:": T.G. Lewis et al.

Dates

Include just the year of publication for books. For periodicals, include either the month and year or the volume number, issue number, and year. If a periodical appears more frequently than monthly, include the date with the month: 15 Mar. 2000. If a periodical appears quarterly, use the season or issue number, depending on the periodical's usage. For periodicals that appear irregularly, do not use the month: vol. 16, no. 5, 1997.

Electronic references

References to electronic repositories are acceptable in IEEE Computer Society publications, but they are not the references of choice for formal archival use. If possible, replace such references with references to printed material. However, when this is not possible, cite the electronic address along with as much additional information as possible. If the address itself becomes invalid in the future, the other information might help researchers find the same document elsewhere on the Internet. At the very least, a reference to an electronic source must include the Internet URL.

When citing an electronic reference simply to give the reader a place to go for more information, instead of including it in a formal reference list, noting it within parentheses in the running text is acceptable. Because such references break the flow of the text, use them sparingly and do not set them off in italic, boldface, or typewriter font. If an article includes many electronic references, consider placing them in a sidebar or a broken-out list.

When referring to various portions of a WWW page in text, use an initial cap for the designated item. Do not set it off with quotes, parentheses, or italics. Thus, a sample reference could be, The proper way to search the page is to click on the Go button, or The text can be found in the Publications section of the company's Web site.

When referring to hypertext links found on a Web page (the highlighted underlined words), put the entire text of the link in quotes. For example, Click on the "go here" link to reach the table.

When referring to URLs in a string of text, don't apply extra formatting.

Publications

Italicize names of books (including collections), magazines, journals, newsletters, technical reports, and manuals. Use quotation marks to enclose names of articles, papers, theses,
Use an en dash to indicate multiple issue numbers, for example, vol. 5, nos. 1–4. Use a slash to denote the issue for bimonthly publications, for example, Aug./Sept. For quarterly publications, use an en dash to denote the issue, for example, Jan.–Mar. If the name of a column is cited in the reference, use initial caps without quotation marks, for example, Binary Critic.

After the name of a book, thesis, proceedings, or other book-like material, list the publisher, year of publication, and inclusive page numbers if applicable. Delete terms such as Co., & Co., Ltd., S.A., Publisher, and Publishing Co.; retain Press. Where the publisher is a university, add its location if needed for clarity, for example, Miami University, Ohio.

Do not include the editor’s name for a conference proceedings unless it is an edited volume published as a book.

References for proceedings should tell where an interested reader can find the source, not where the conference took place. If a proceedings did not use a traditional publisher, provide the sponsoring organization and its location.

**Titles**

Capitalize the first and last words, and all nouns, pronouns, adjectives, verbs, adverbs, and subordinating conjunctions. Lowercase articles, coordinating conjunctions, and prepositions, regardless of length. Example: Toward Better Real-Time Programming through Dataflow.

To make a source easy for researchers to find, use the title as it originally appears. Do not add or remove hyphens, change words to preferred spellings, or lowercase internal capitals.

For foreign-language references, provide the original title first, followed by its English translation (if available) in brackets: Zur experimentalen Aesthetic [Toward an Experimental Aesthetic].

For a complete treatment of titles, see CMS 8.164–8.208.

**Abbreviations in references**

Use the following abbreviations in the titles of periodicals and when naming publishing institutions:

<table>
<thead>
<tr>
<th>Abbreviation</th>
<th>Full Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>Am.</td>
<td>American</td>
</tr>
<tr>
<td>Ann.</td>
<td>Annual</td>
</tr>
<tr>
<td>Assoc.</td>
<td>Association</td>
</tr>
<tr>
<td>Bull.</td>
<td>Bulletin</td>
</tr>
<tr>
<td>Comm.</td>
<td>Communications (of)</td>
</tr>
<tr>
<td>Conf.</td>
<td>Conference (on)</td>
</tr>
<tr>
<td>CS</td>
<td>Computer Society</td>
</tr>
<tr>
<td>Dept.</td>
<td>Department (of)</td>
</tr>
<tr>
<td>ed.</td>
<td>edition, editor</td>
</tr>
<tr>
<td>Eng.</td>
<td>Engineering</td>
</tr>
<tr>
<td>Fed.</td>
<td>Federal</td>
