C O U R S E : ____________________  SEMESTER AND YEAR: ____________________

STUDENT NAME: ____________________

STUDENT RESPONSIBILITIES:

1. Students are expected to keep a copy of the Programming Assignment Policies handy. This guarantees that students are aware of what the expectations are regarding the format of Programming Assignments and how they are submitted.

2. Students are expected to keep a copy of the Programming Assignment specifications. It is the students’ responsibility to fully understand the requirements and features of the Project you are implementing for this Assignment.

3. Students are responsible for maintaining copies of all files submitted to guarantee the existence and availability of back-ups in case some or all of these files get lost, accidentally modified or deleted.

4. Students are responsible for turning in programs in time. Late programs will strictly not be accepted.

5. Programming Assignments are not group projects. Students must work individually.
   a) Collaborative work is strictly prohibited. Asking classmates or other people for help in solving class problems (programs, homework, or exams) is considered academic dishonesty. Discussions outside of class must be limited to the algorithmic level. If you are not sure whether any activity is acceptable, consult your Instructor for verification.
   b) No assistance may be given by anyone other than the Instructor (and when appropriate, the Graduate Teaching Assistant) of this class. Due to the apparent lack of clarity, the term “assistance” means any help or discussion regarding the implementation of Programming Assignments for this course.
   c) Students are assumed to turn in their own work and not the work of another person nor a group of people. It is not necessary to cite the text(s) for the course as reference, but other literature consulted in developing solutions to any of the class problems should be referenced precisely. Failure to cite sources that contributed substantially to the solution of a class problem is considered academic dishonesty.

CSU Chico’s Ethical Standards and Disciplinary Procedures, published in the University Catalog, will be strictly enforced. Any infraction of the aforementioned guidelines will be considered an infraction of this Honor Code. Such infractions will be dealt with according to Executive Order 628 (Student Disciplinary Procedures for The California State University). Please refer to Executive Memorandum 92-06 (Code of Students’ Rights and Responsibilities) in the University Catalog for more information regarding CSU Chico’s Student Code of Conduct and Academic Responsibility.

PLEDGE:

My signature below attests that I have read, fully understand, and agree to adhere to the requirements and guidelines outlined above. I pledge not to give any assistance nor receive assistance from any unauthorized source during the preparation of my Programming Assignments.
