CSCI 585(224)/682(329): Robotics and Machine Intelligence
Abbreviated Syllabus for Spring Semester 2005
Visit http://www.ecst.csuchico.edu/~juliano/csci224 for additional detail.

Prerequisites
- **CSCI majors:**
  - CSCI 51A (Assembly Language Programming)
  - CSCI 151 (Algorithms and Data Structures)
- **ECE / ME / MECA majors:**
  - ECE 86 (Processor Architecture and Assembly Language Programming)
  - ECE 90 (Algorithms and Programs for Engineers)

Description
3 units. This course introduces students to the field of robotics by emphasizing the task of endowing machines with intelligence. Topics include various case studies of robot architectures and algorithms that facilitate embodying a robot with behaviors that are traditionally associated with human cognition (e.g., perception, reasoning, intelligent navigation, vision, learning, etc.). Students will conduct robotics experiments and participate in robotics exhibitions.

Grade Evaluation
This is a project-centered course. A total of at least three (3) projects will be assigned during the semester. Some projects will be individual projects while others will be group/team projects. Additionally, some projects may involve participation in an exhibition with other individuals/teams in the class. Each project must be accompanied by a detailed written report and possibly a web-enabled version of the report. Students are expected to be ready to present their project(s) orally when asked to.
