

Completing Tests and Homework

Using the Keypad outside of Class

Your keypad can be used to store answers from a homework assignment or from a test handed out in class.

Up to 100 answers can be saved for up to 5 different assignments

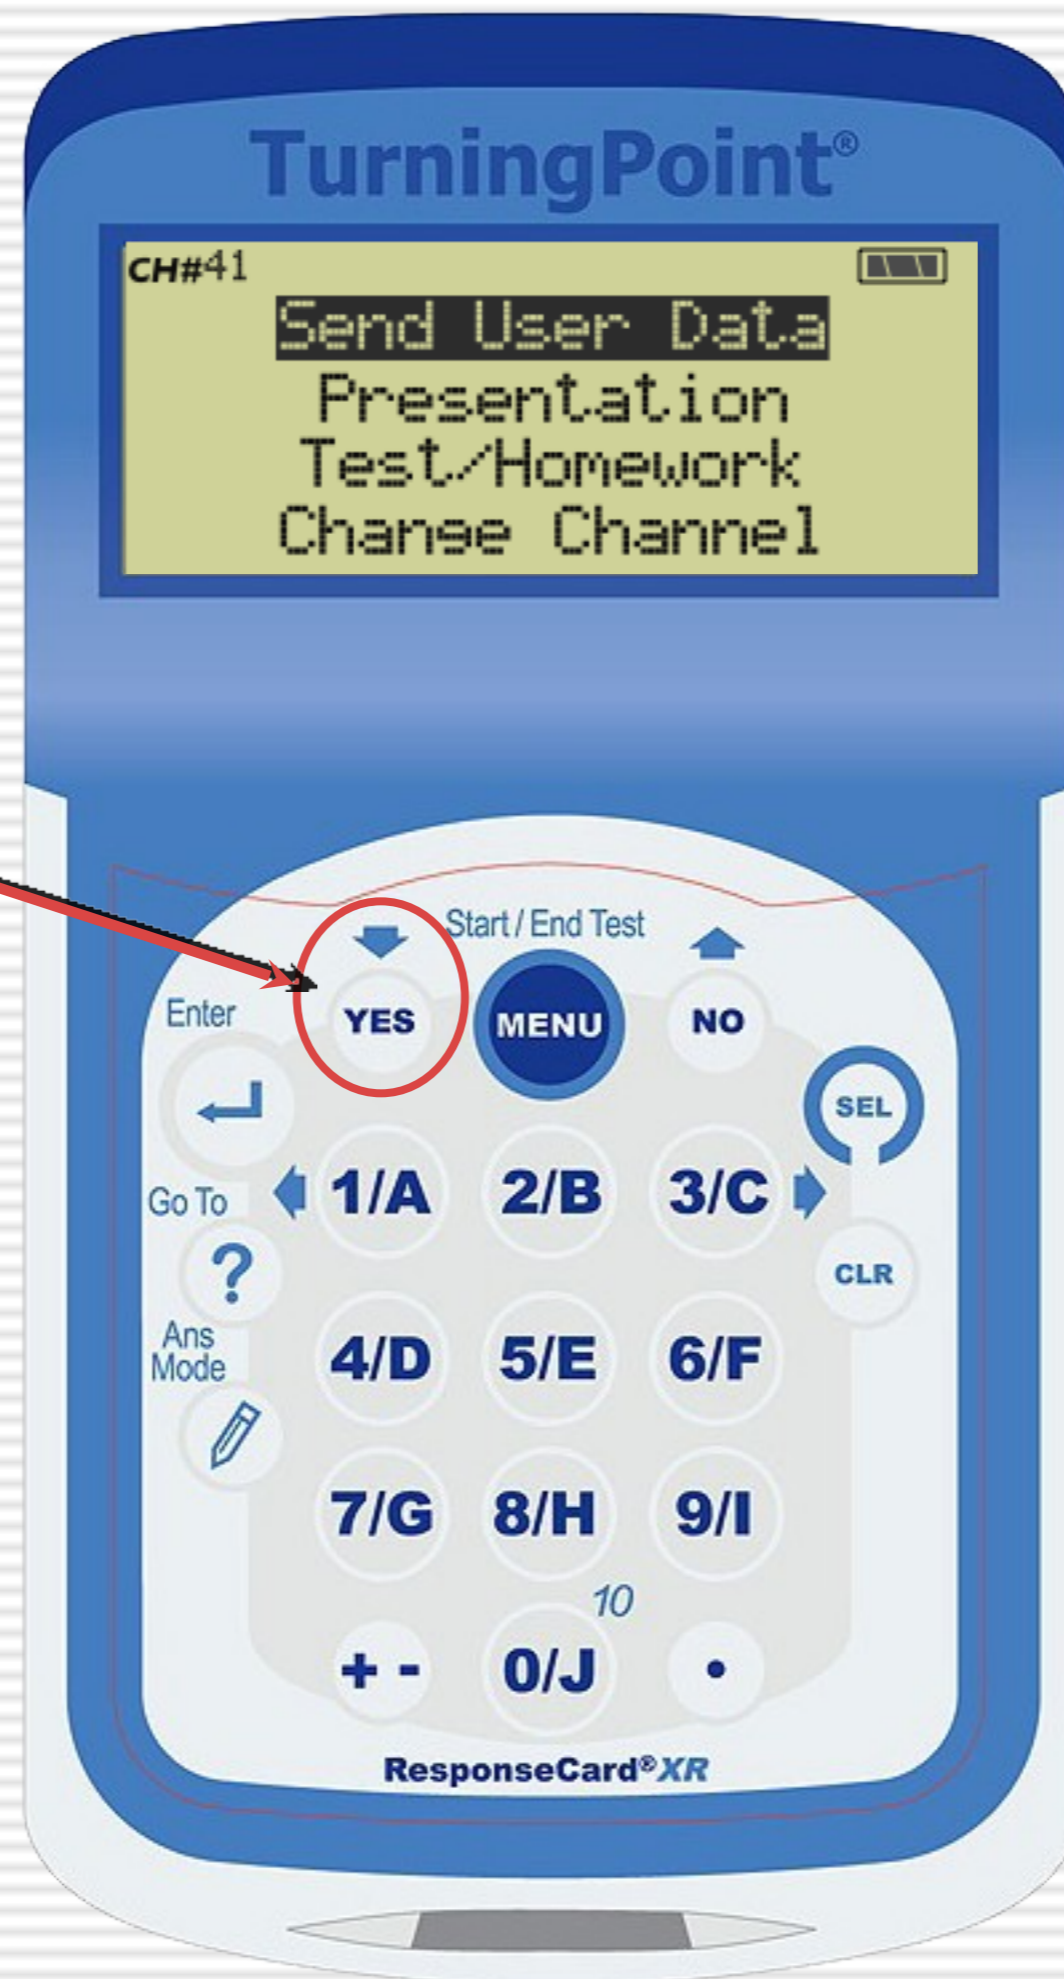

You can work at your own pace and when the assignment is completed, upload all of the answers at the same time.

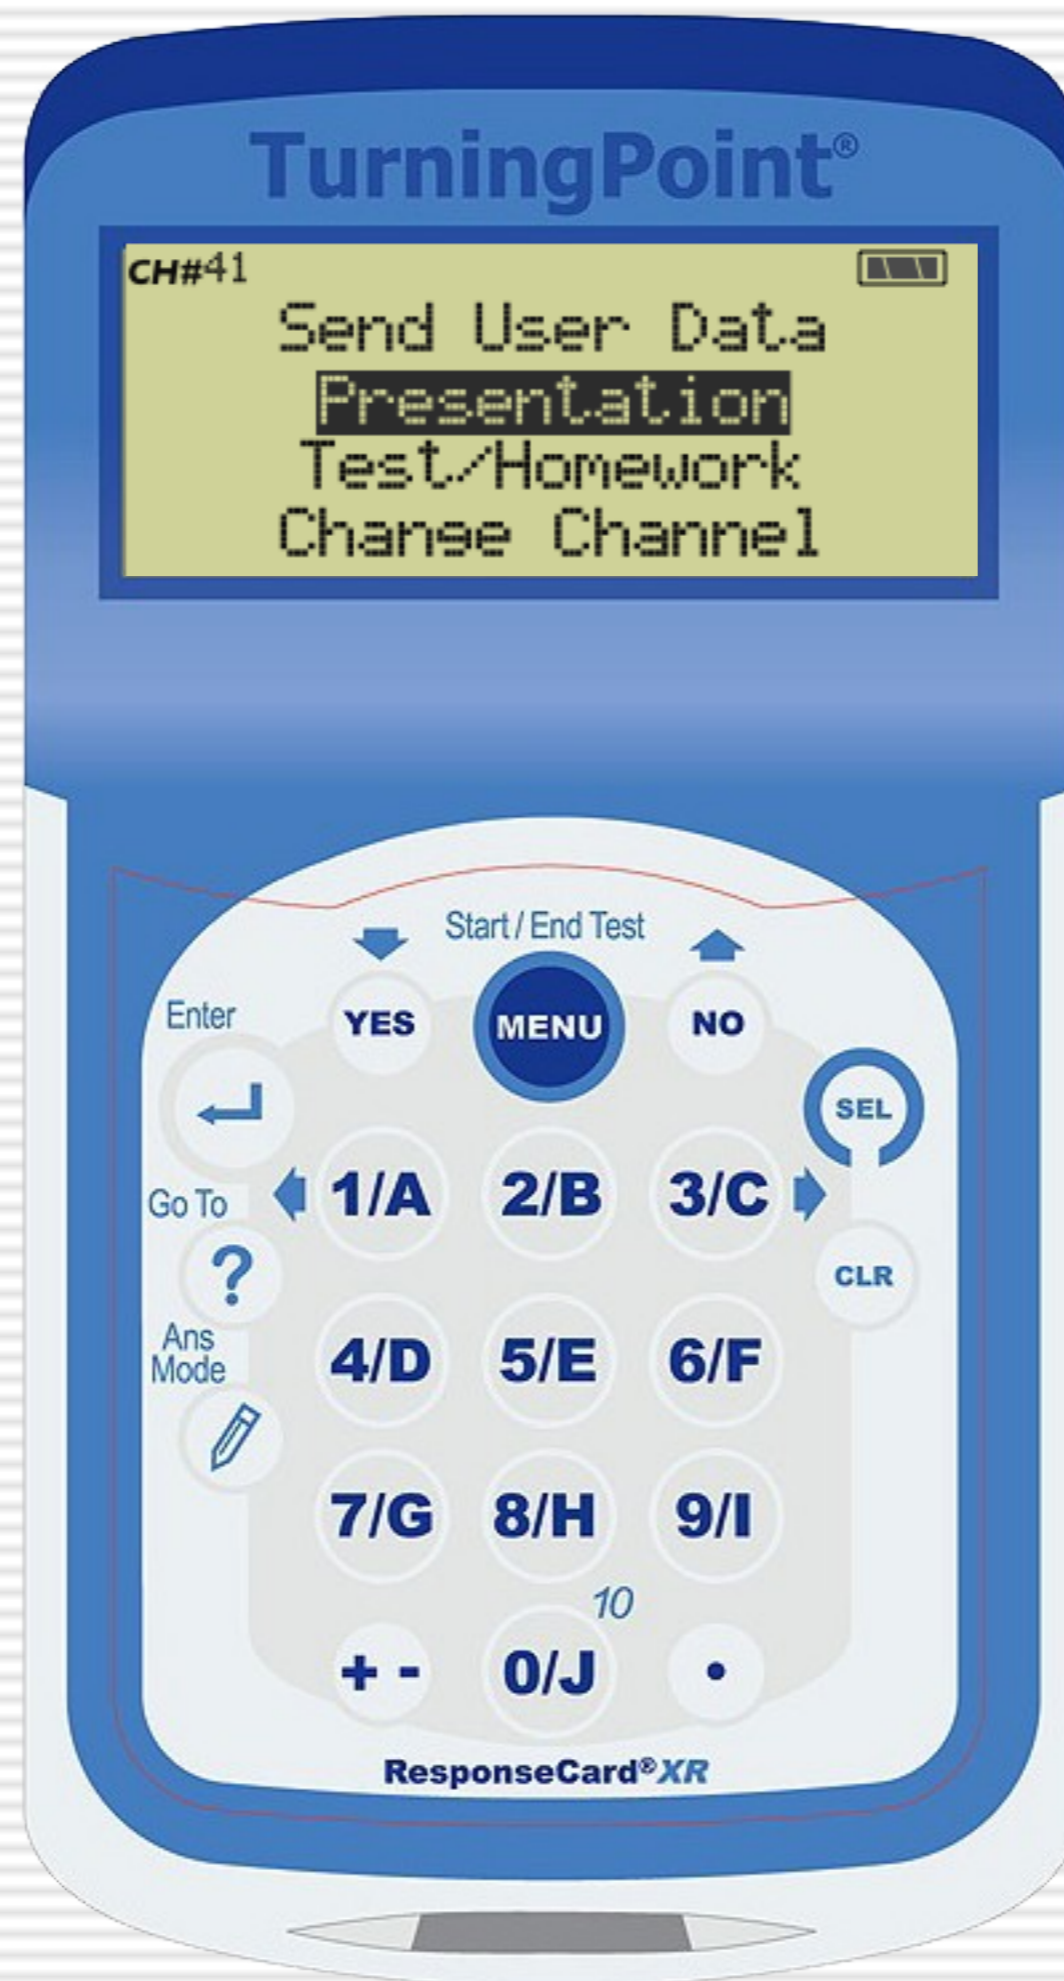

Navigating the Menu

Press the MENU button to bring up the main menu.

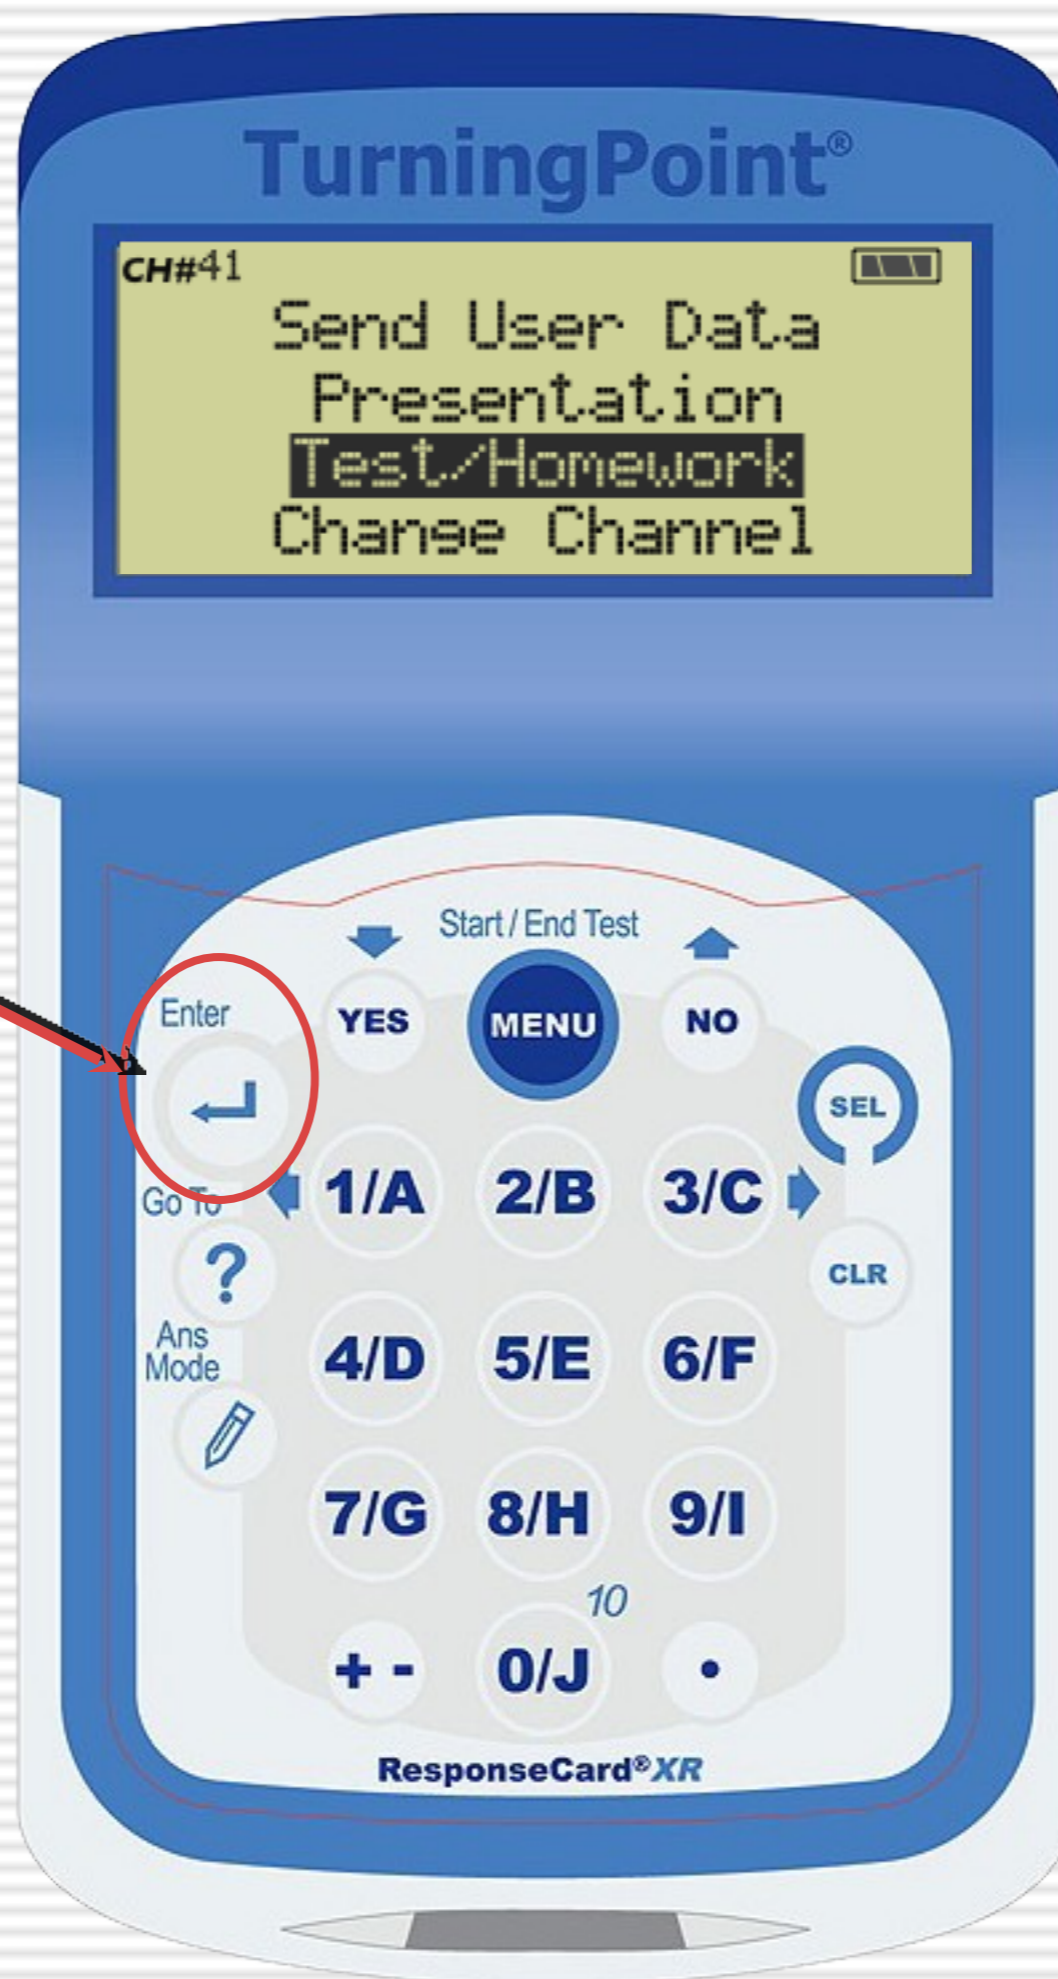

Press YES two times to select the Test/Homework Menu

Navigating the Menu

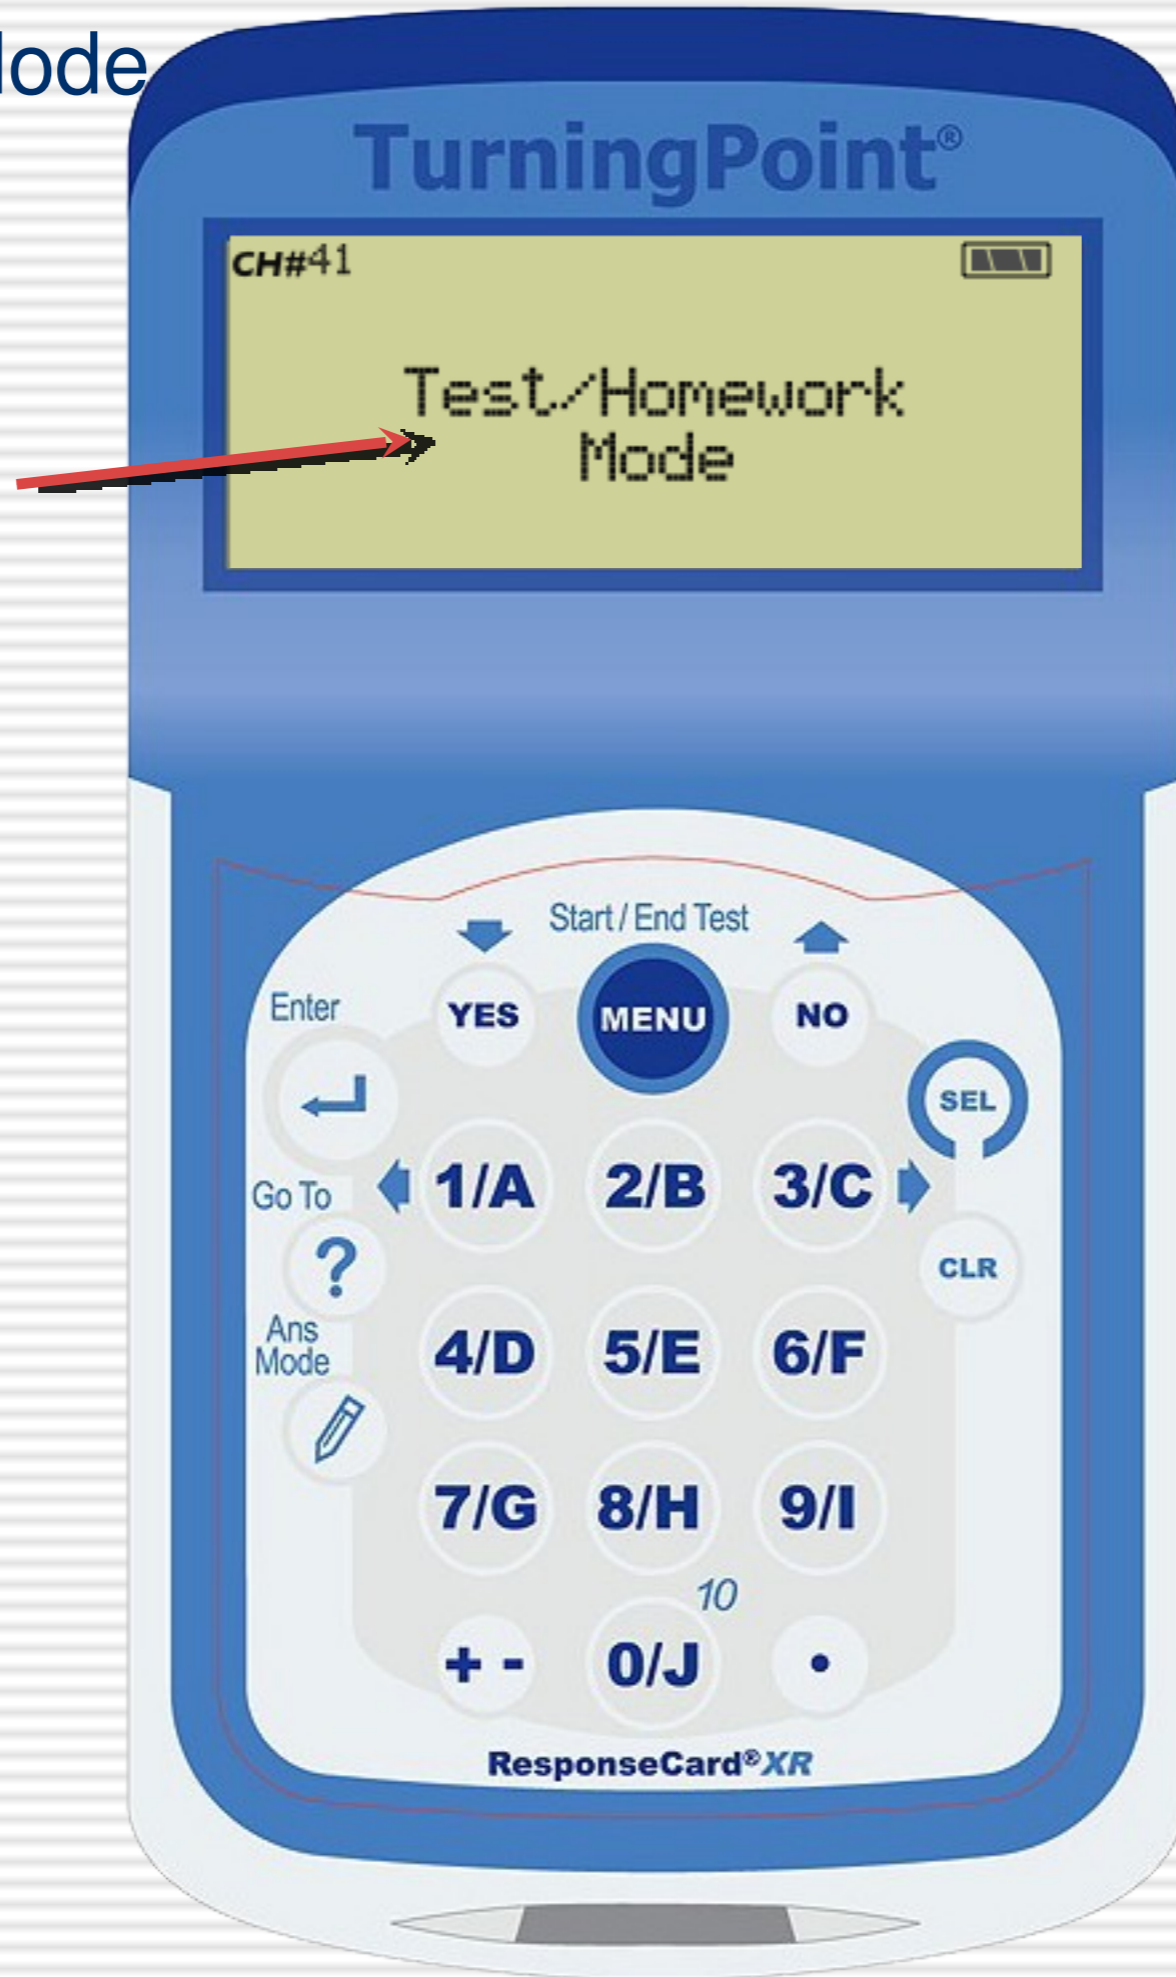

Navigating the Menu

Press Enter to go into Test/Homework

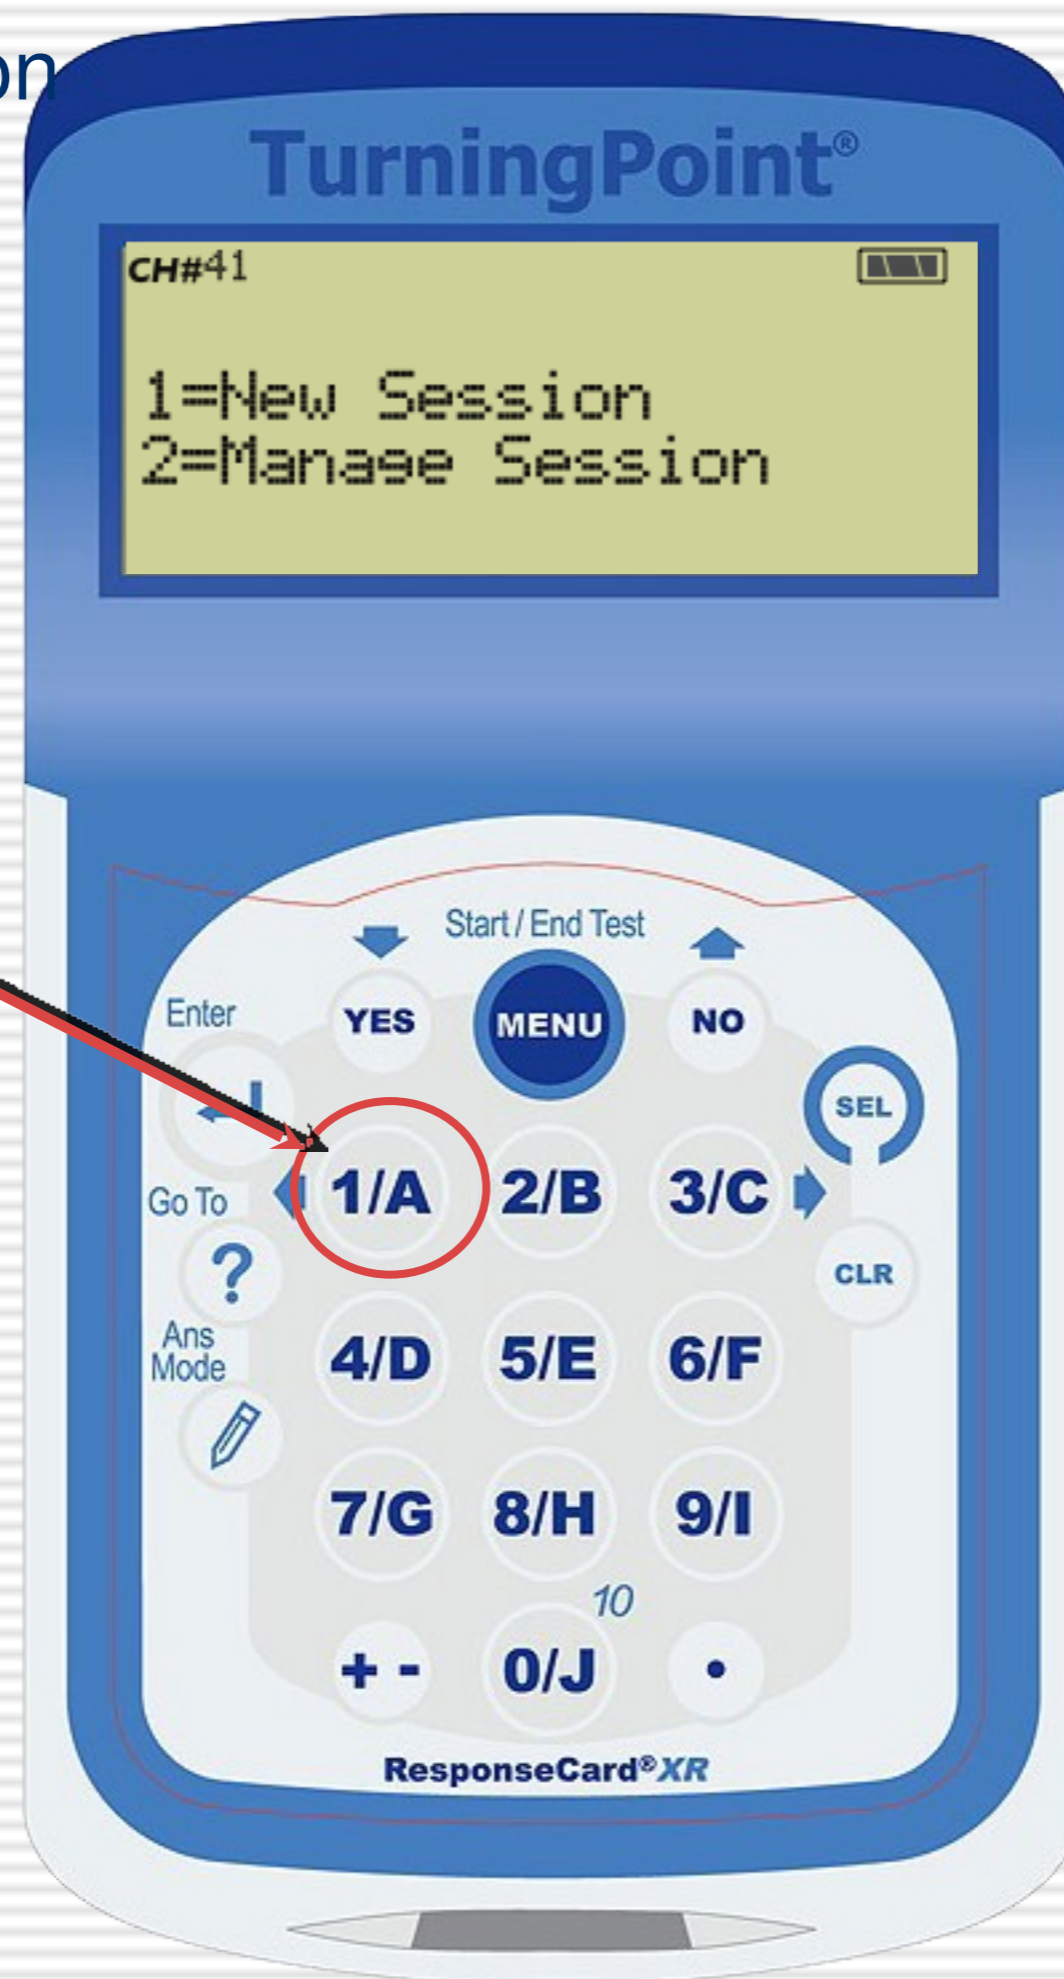

Test/Homework Mode

Test/Homework Mode is momentarily displayed

Create a New Session

Press 1 to create
a new
homework/test
session

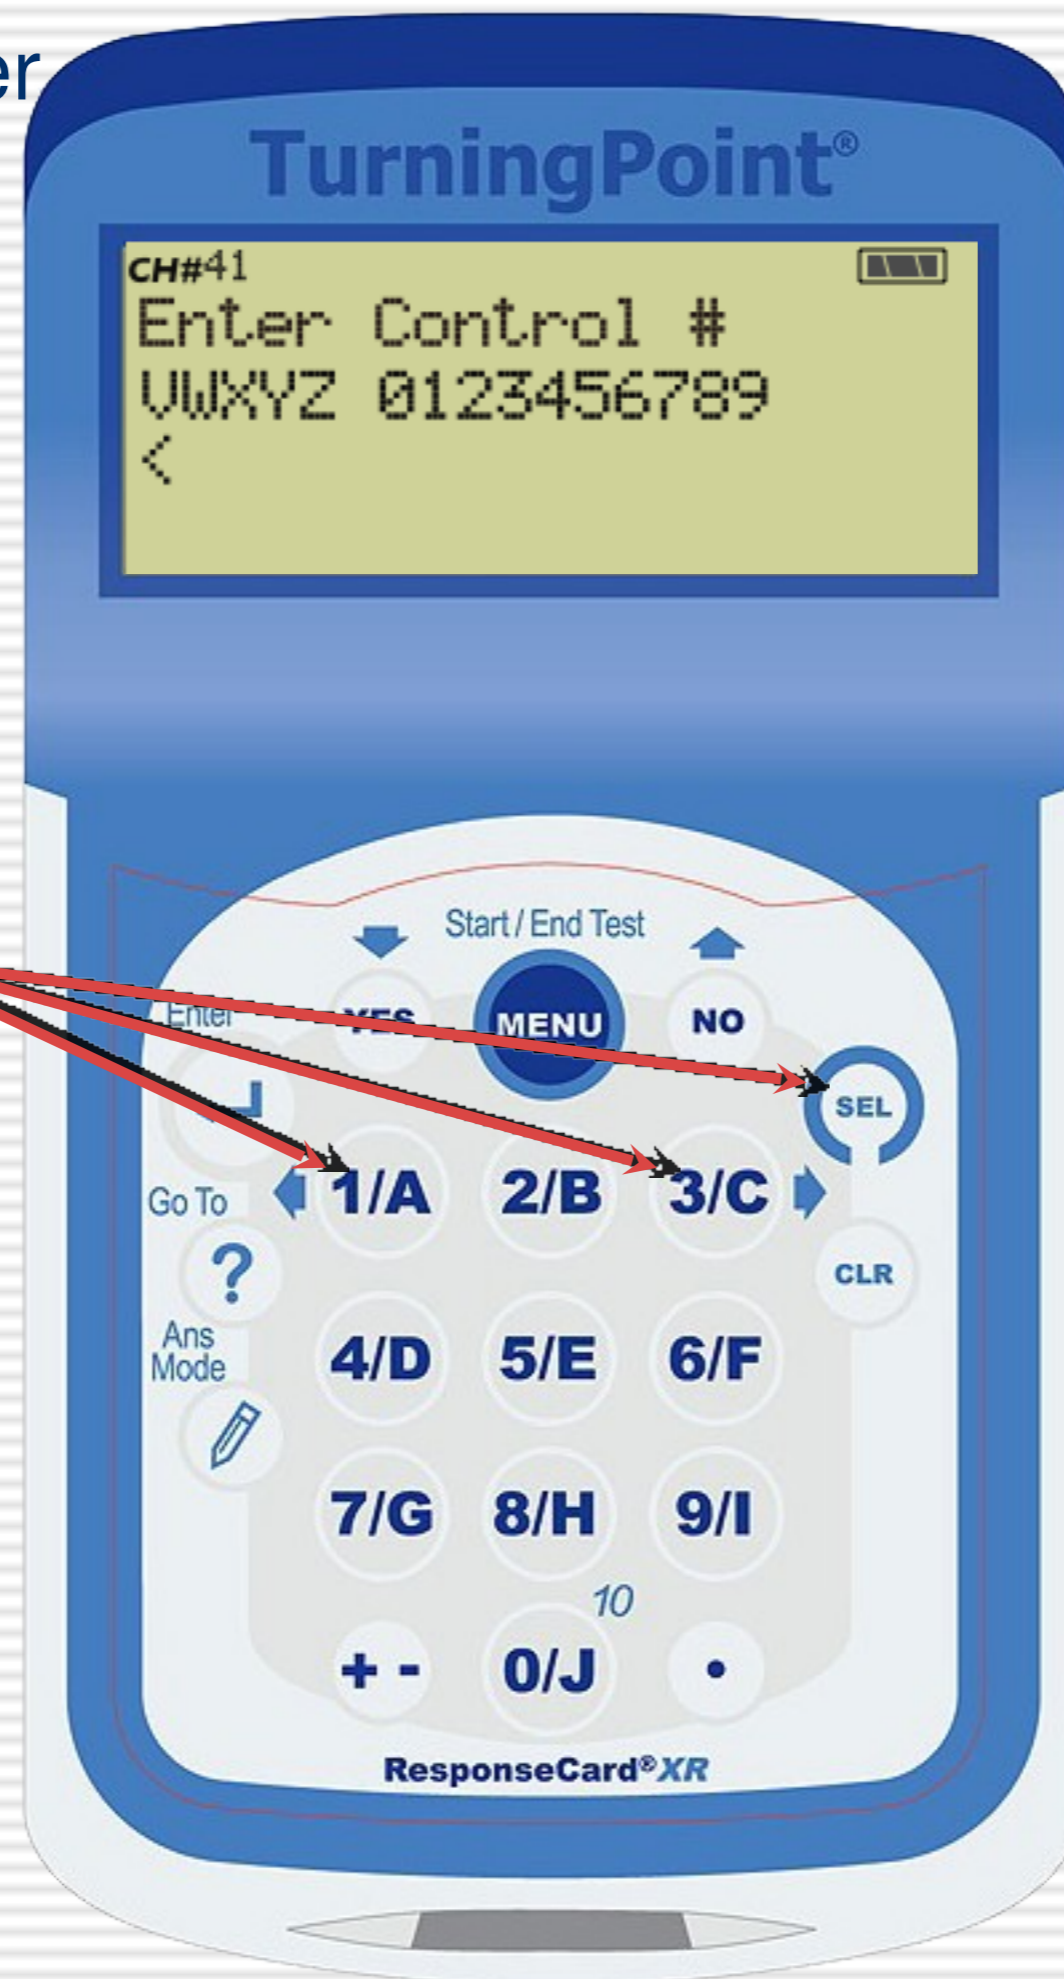

Enter Control Number

A control number is an identifier just for you so that you can identify each homework assignment stored on your keypad.

Use the left and right arrows and the SEL button to enter a control number of your choice

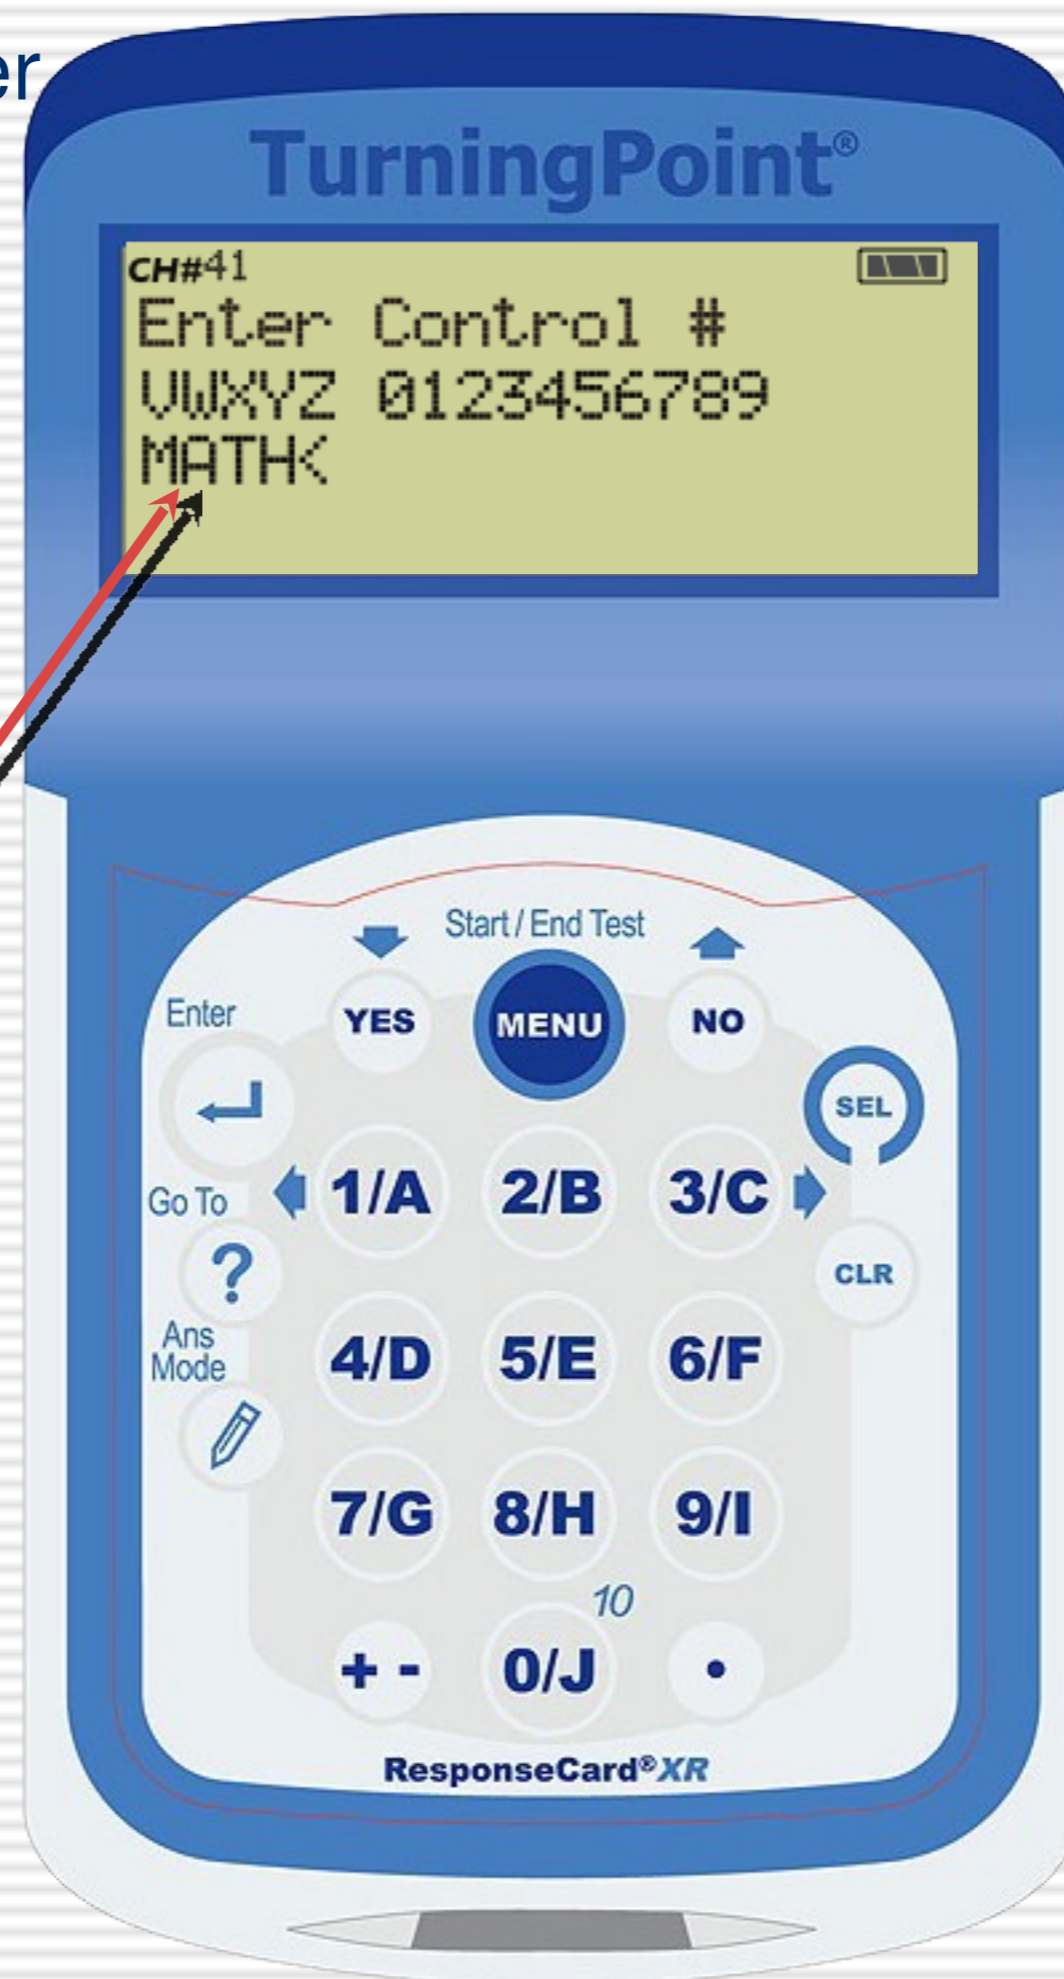

A control number that starts with 1 cannot be edited later.

Enter Control Number

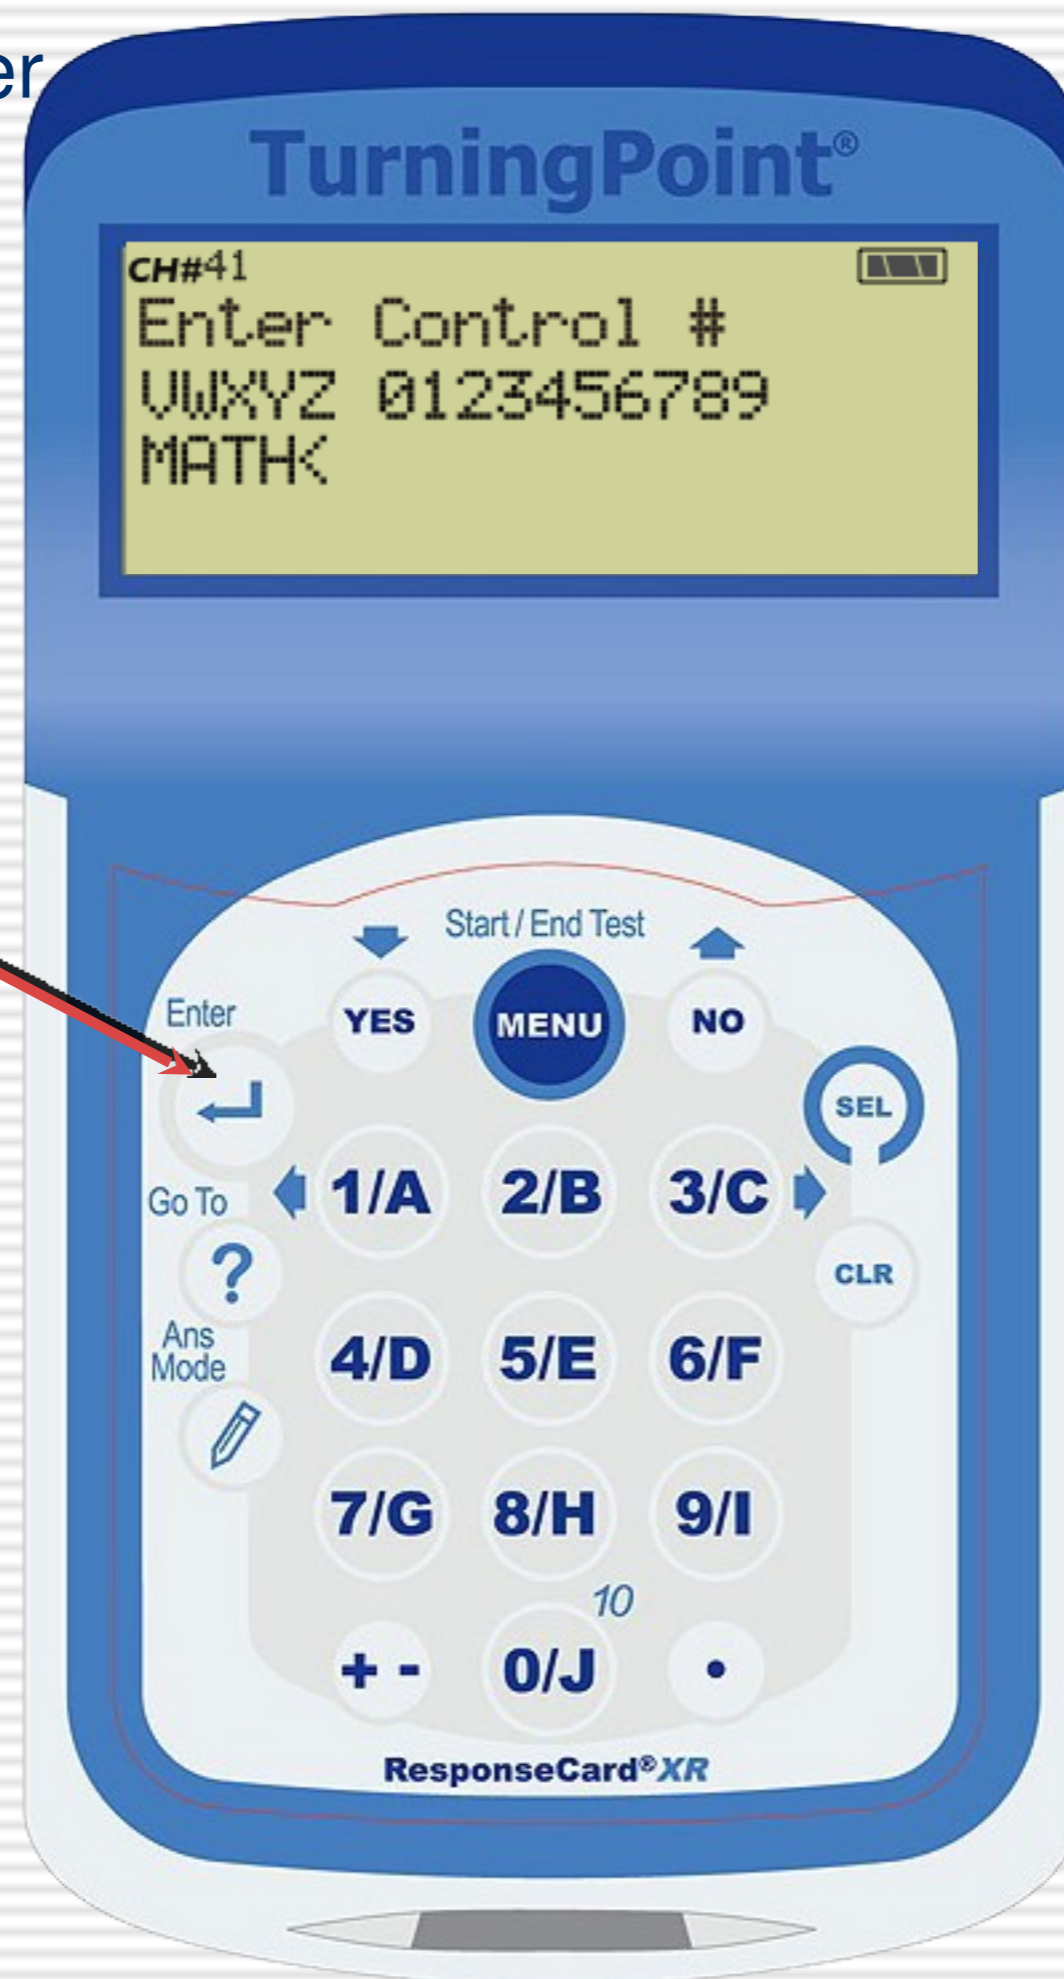

A control number can be any combination of one to four letters or numbers.

Here, we have identified this session as our MATH homework.

Accept Control Number

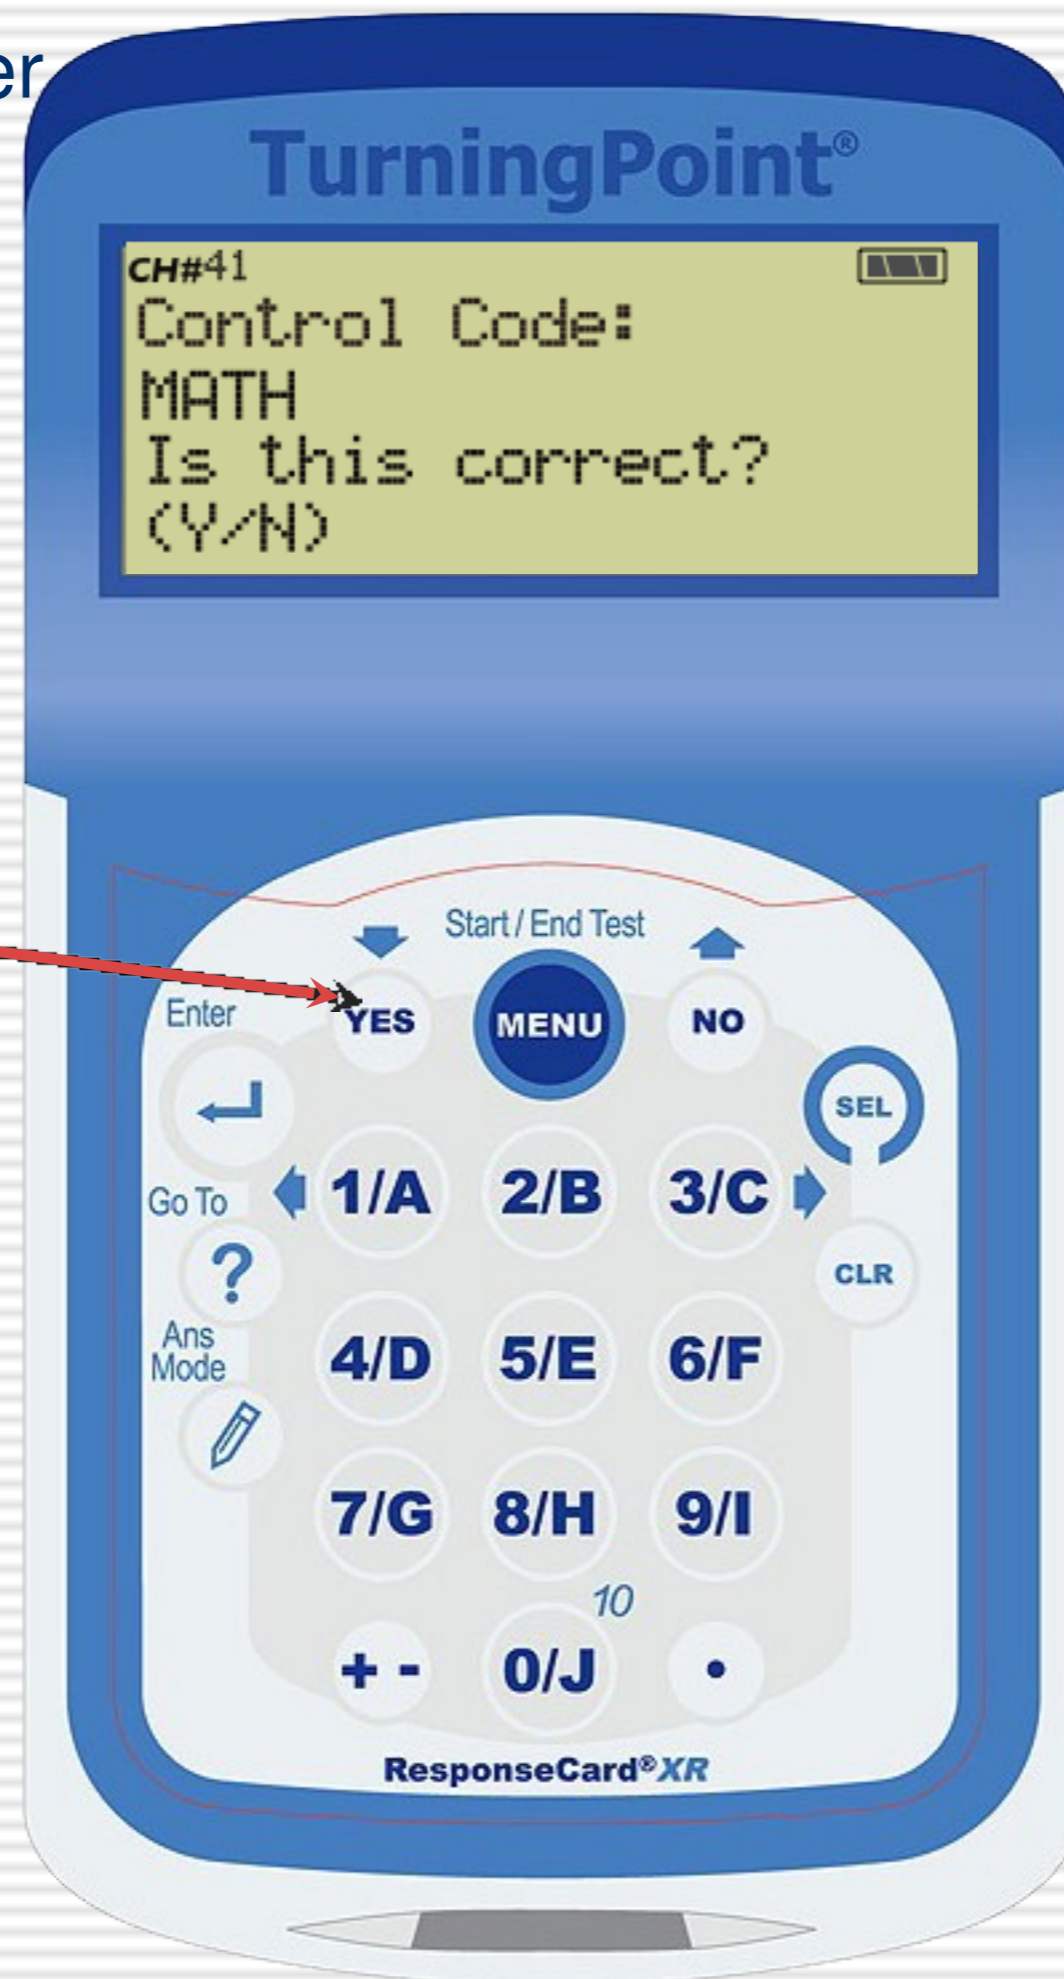

Once you are satisfied with the control number, press the Enter key

Accept Control Number

The keypad will prompt you to verify that you have entered the correct control code.

Press YES to accept this code, NO to edit it.

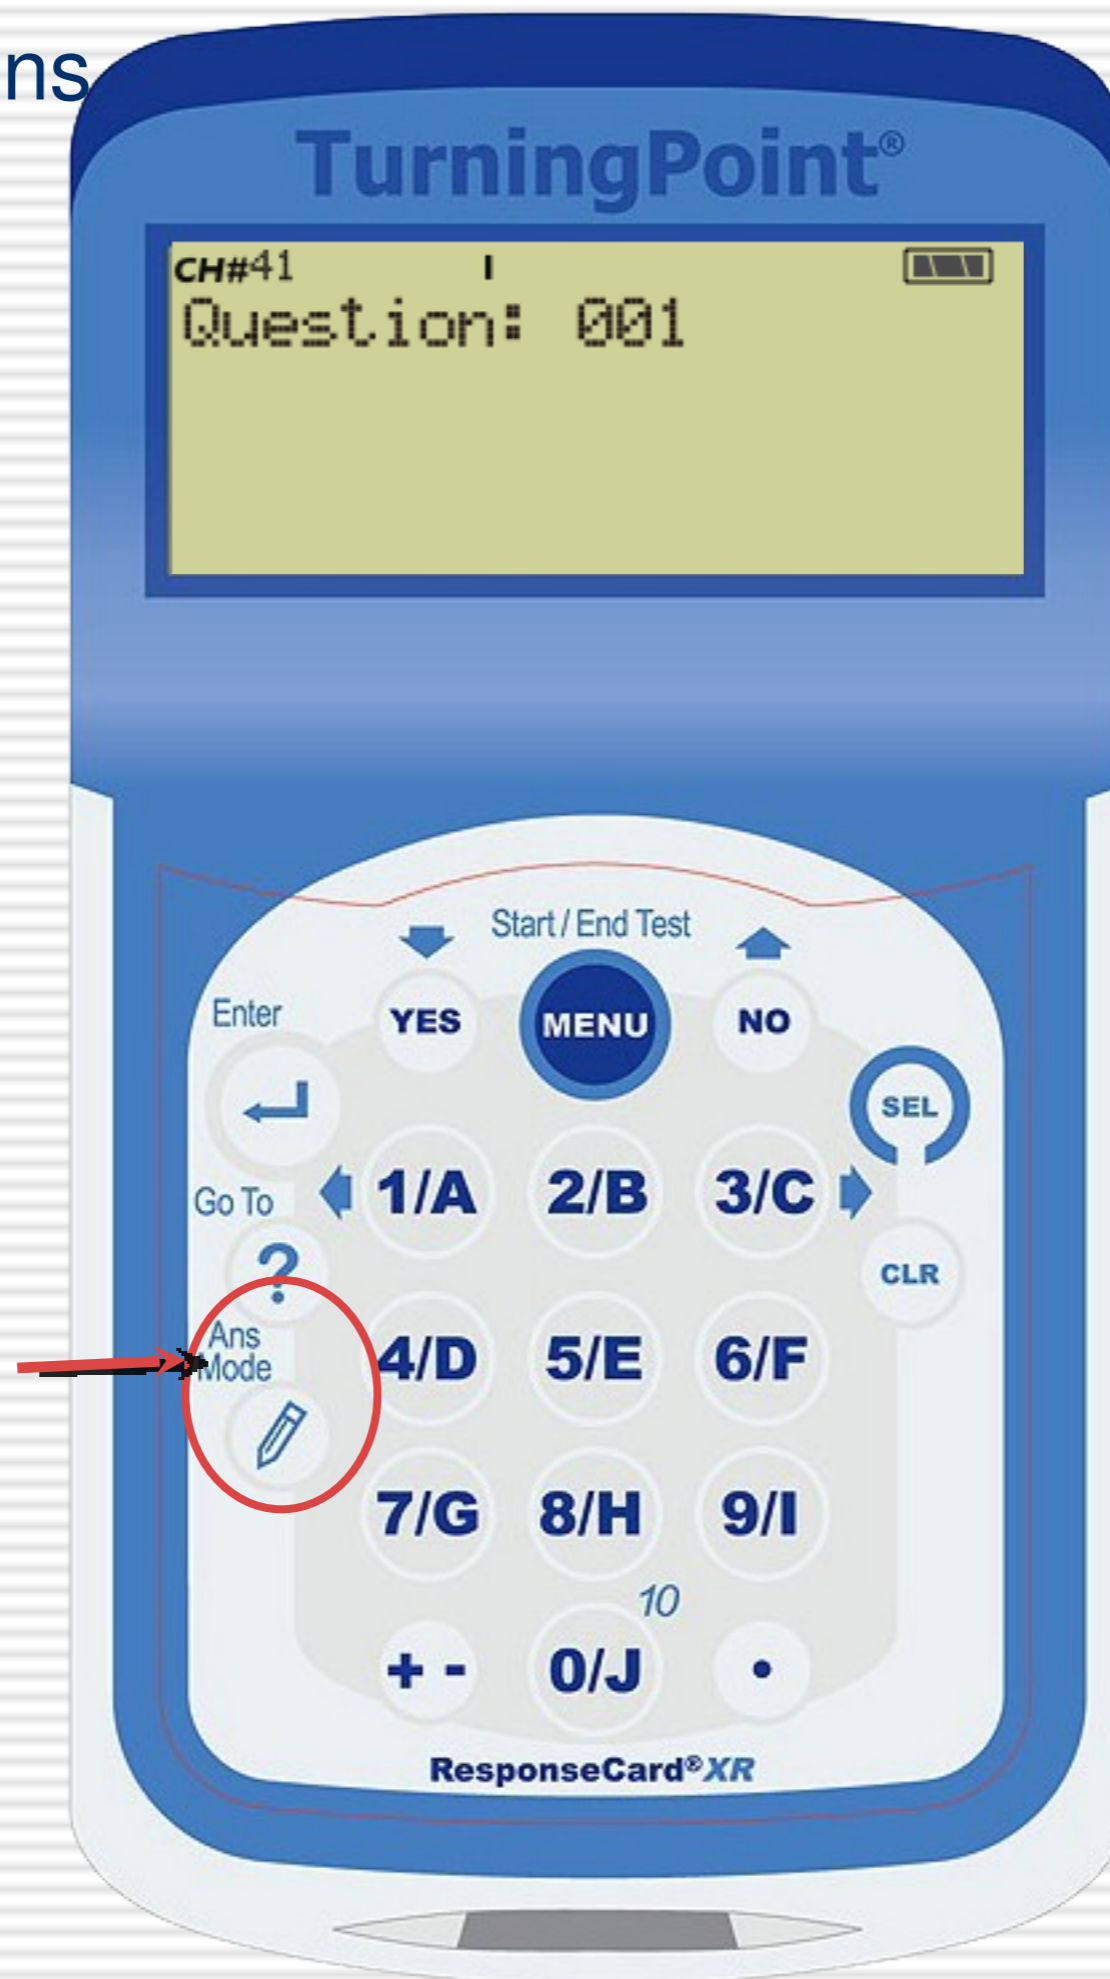

Answer the Questions

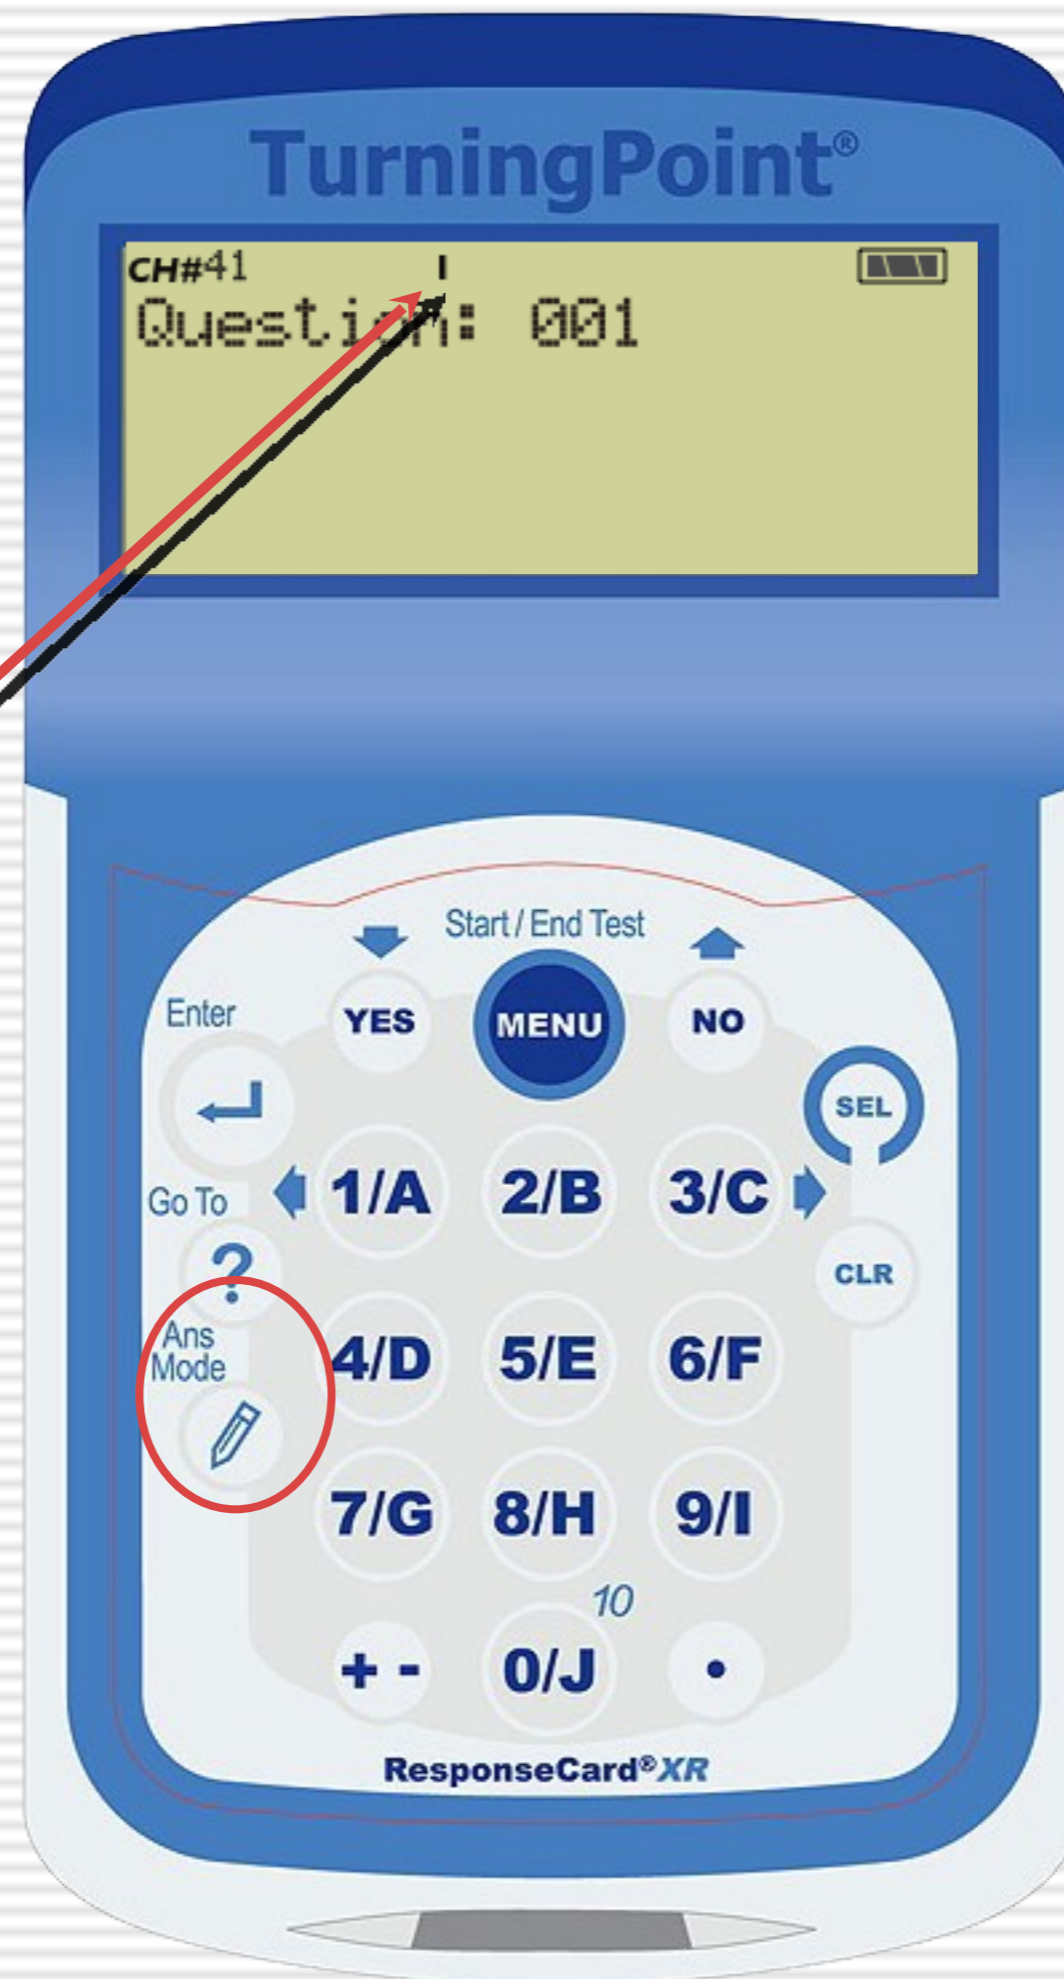

The first question is displayed (001)

Answers can be in any format:
Multiple Choice
Numeric
Fill-in-the-Blank

Use the Ans Mode button to toggle between the different answer modes.

Multiple Choice

The default Ans Mode is multiple choice or single number answers

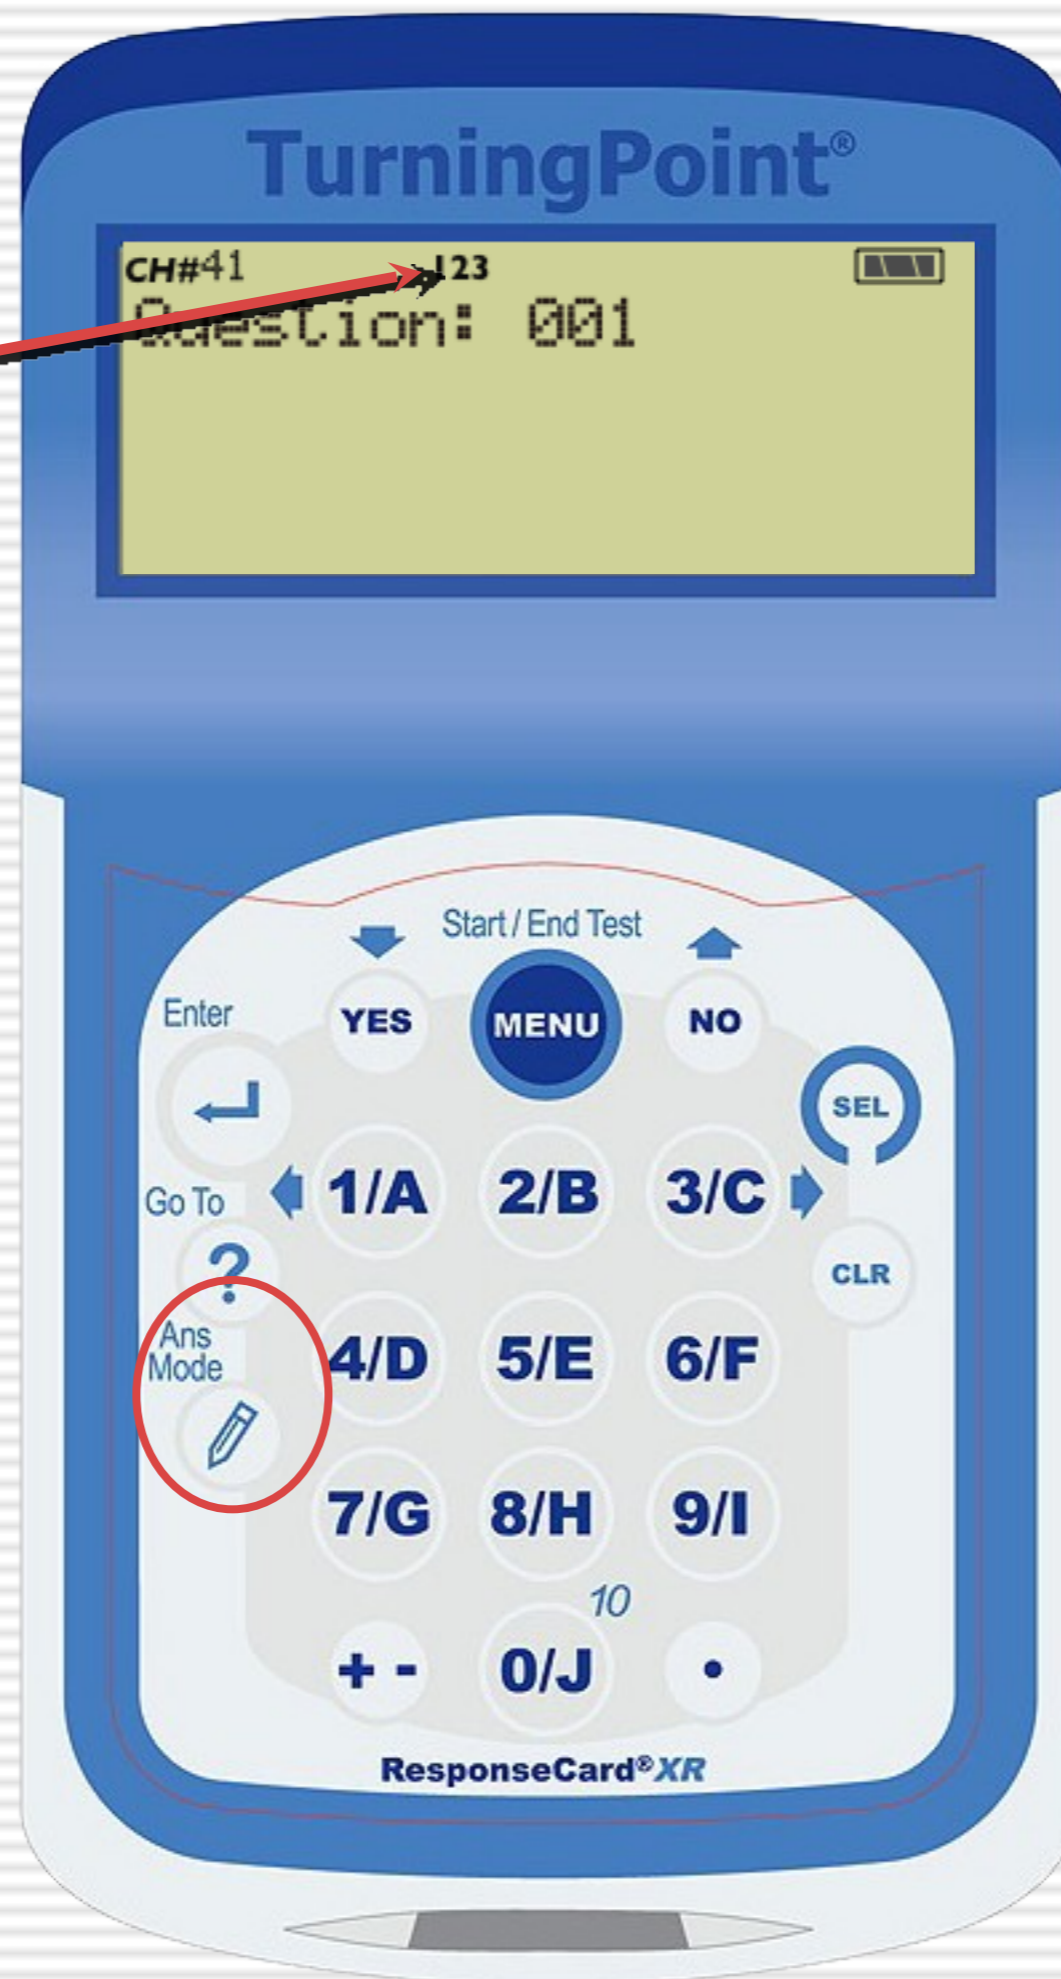

This is indicated by the 1 in the top bar of the display

The question is answered by pressing any one of the numbered keys.

Pressing Ans Mode again will toggle to the next mode.

Numeric Mode

The next Ans Mode is numeric entry. This is indicated by the 123 in the top bar of the display.

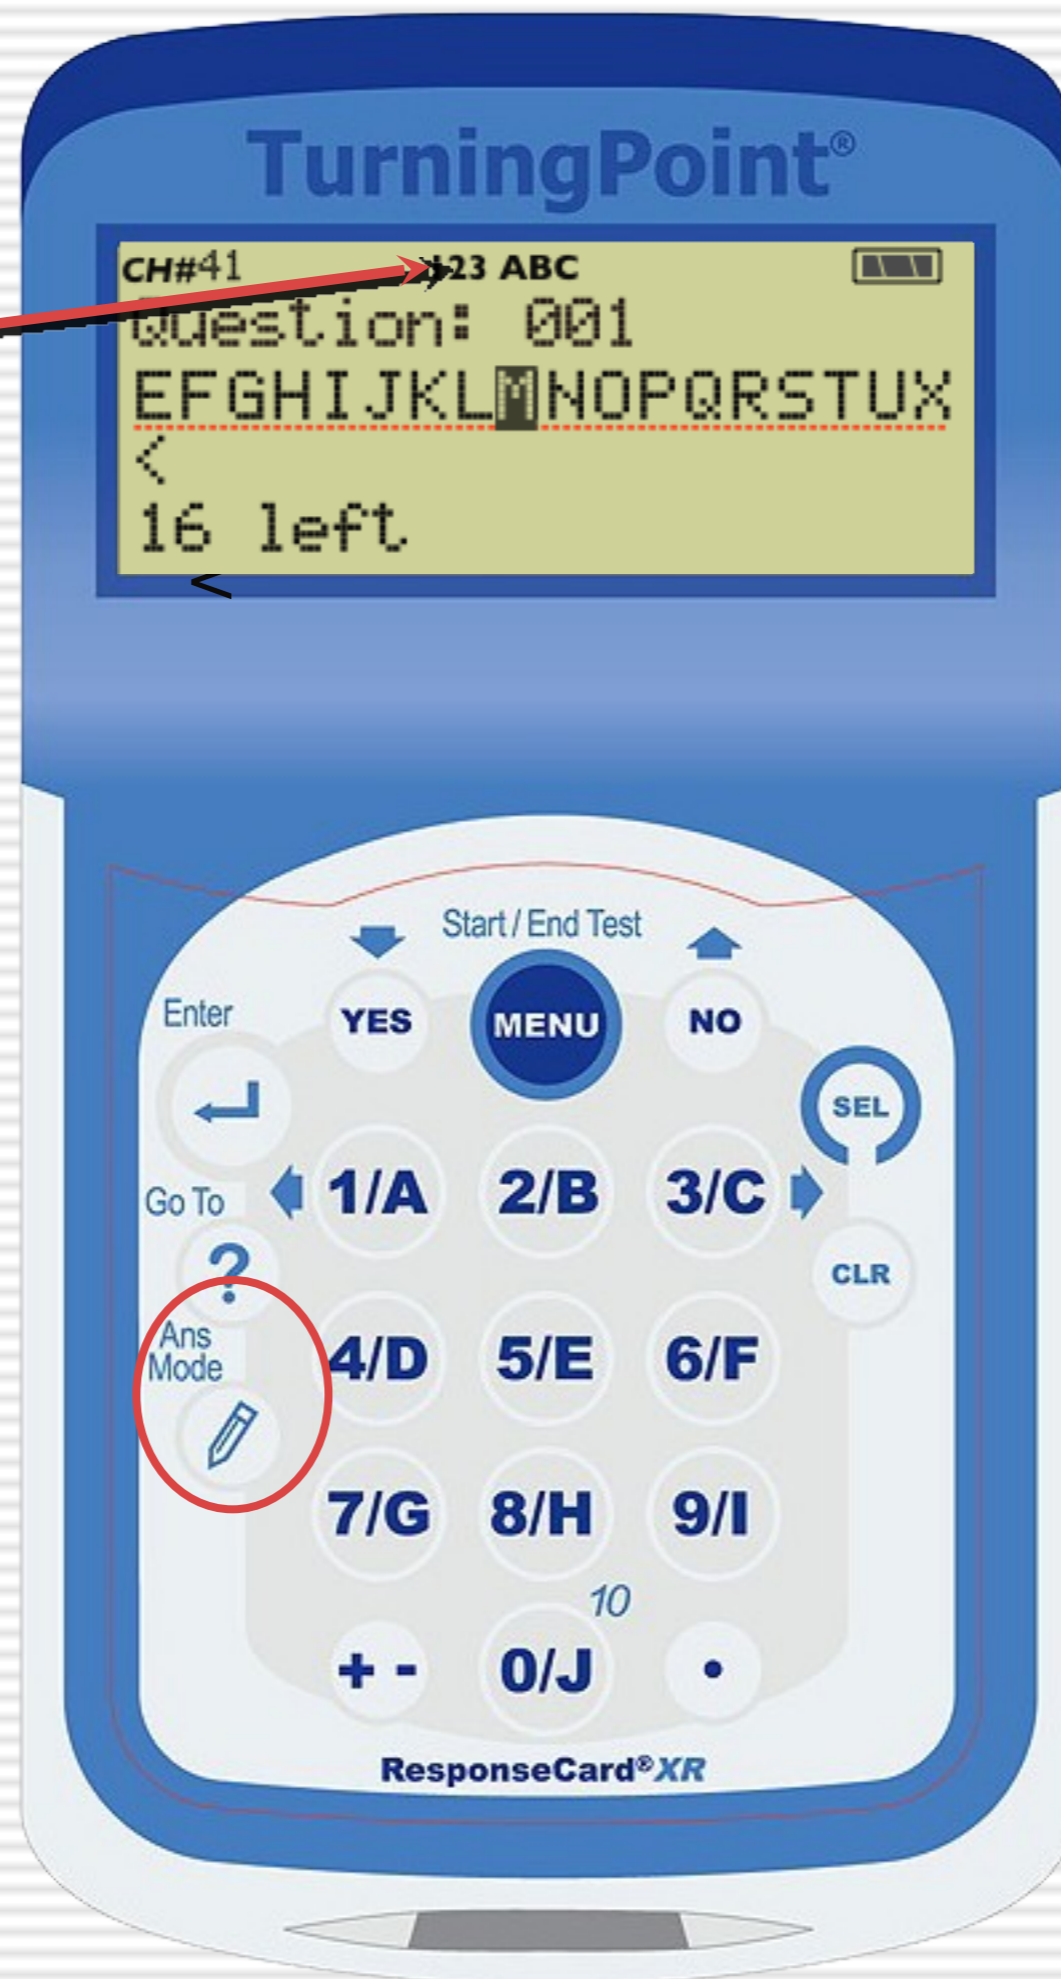

You can now enter numbers, decimals and +/- but you must press Enter when you are done to complete the answer.

Pressing Ans Mode again will toggle to the next mode.

Alpha Mode

The next Ans Mode is alphanumeric entry. This is indicated by the 123 ABC in the top bar of the display.

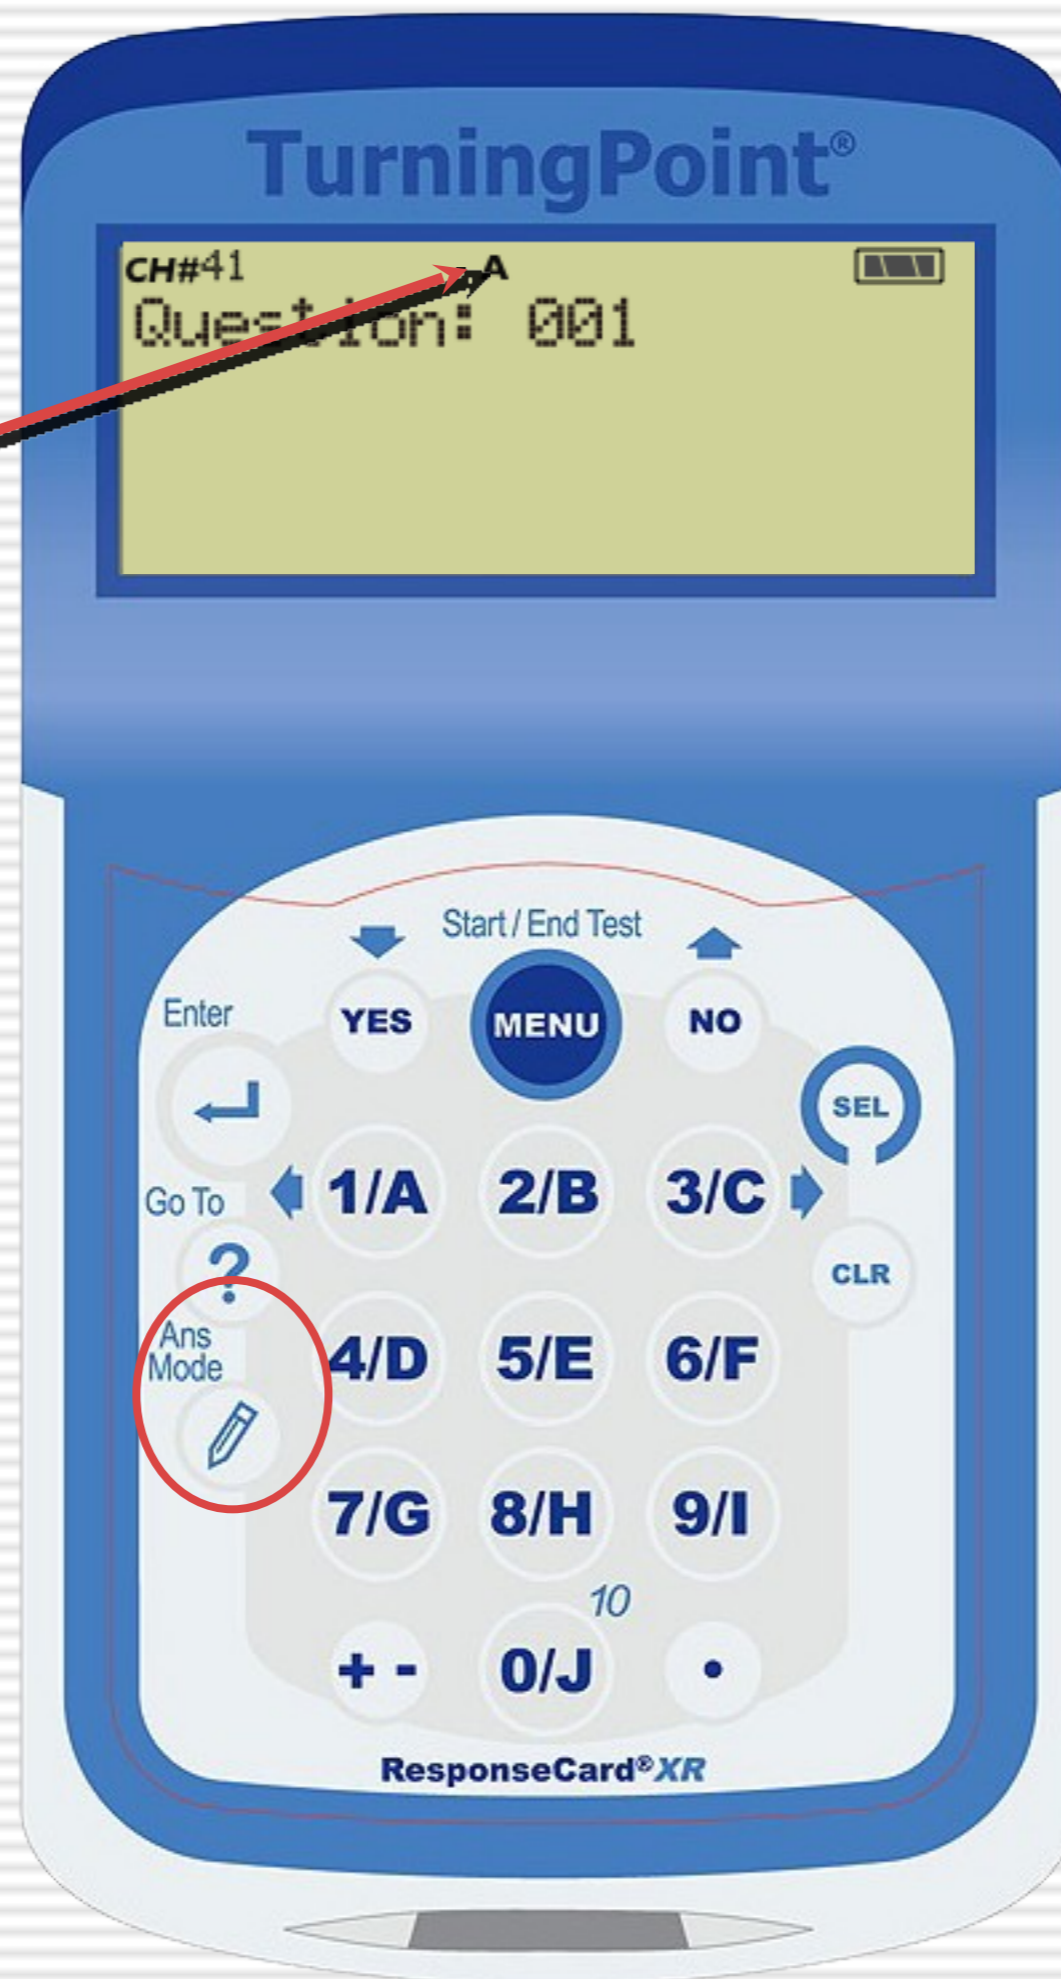

You can enter letters and numbers as you did when setting up your keypad. You must press Enter when you are done to complete the answer.

Pressing Ans Mode again will toggle Single Letter Mode.

Single Letter Mode

The final Ans Mode is single letter entry. This is indicated by the A in the top bar of the display.

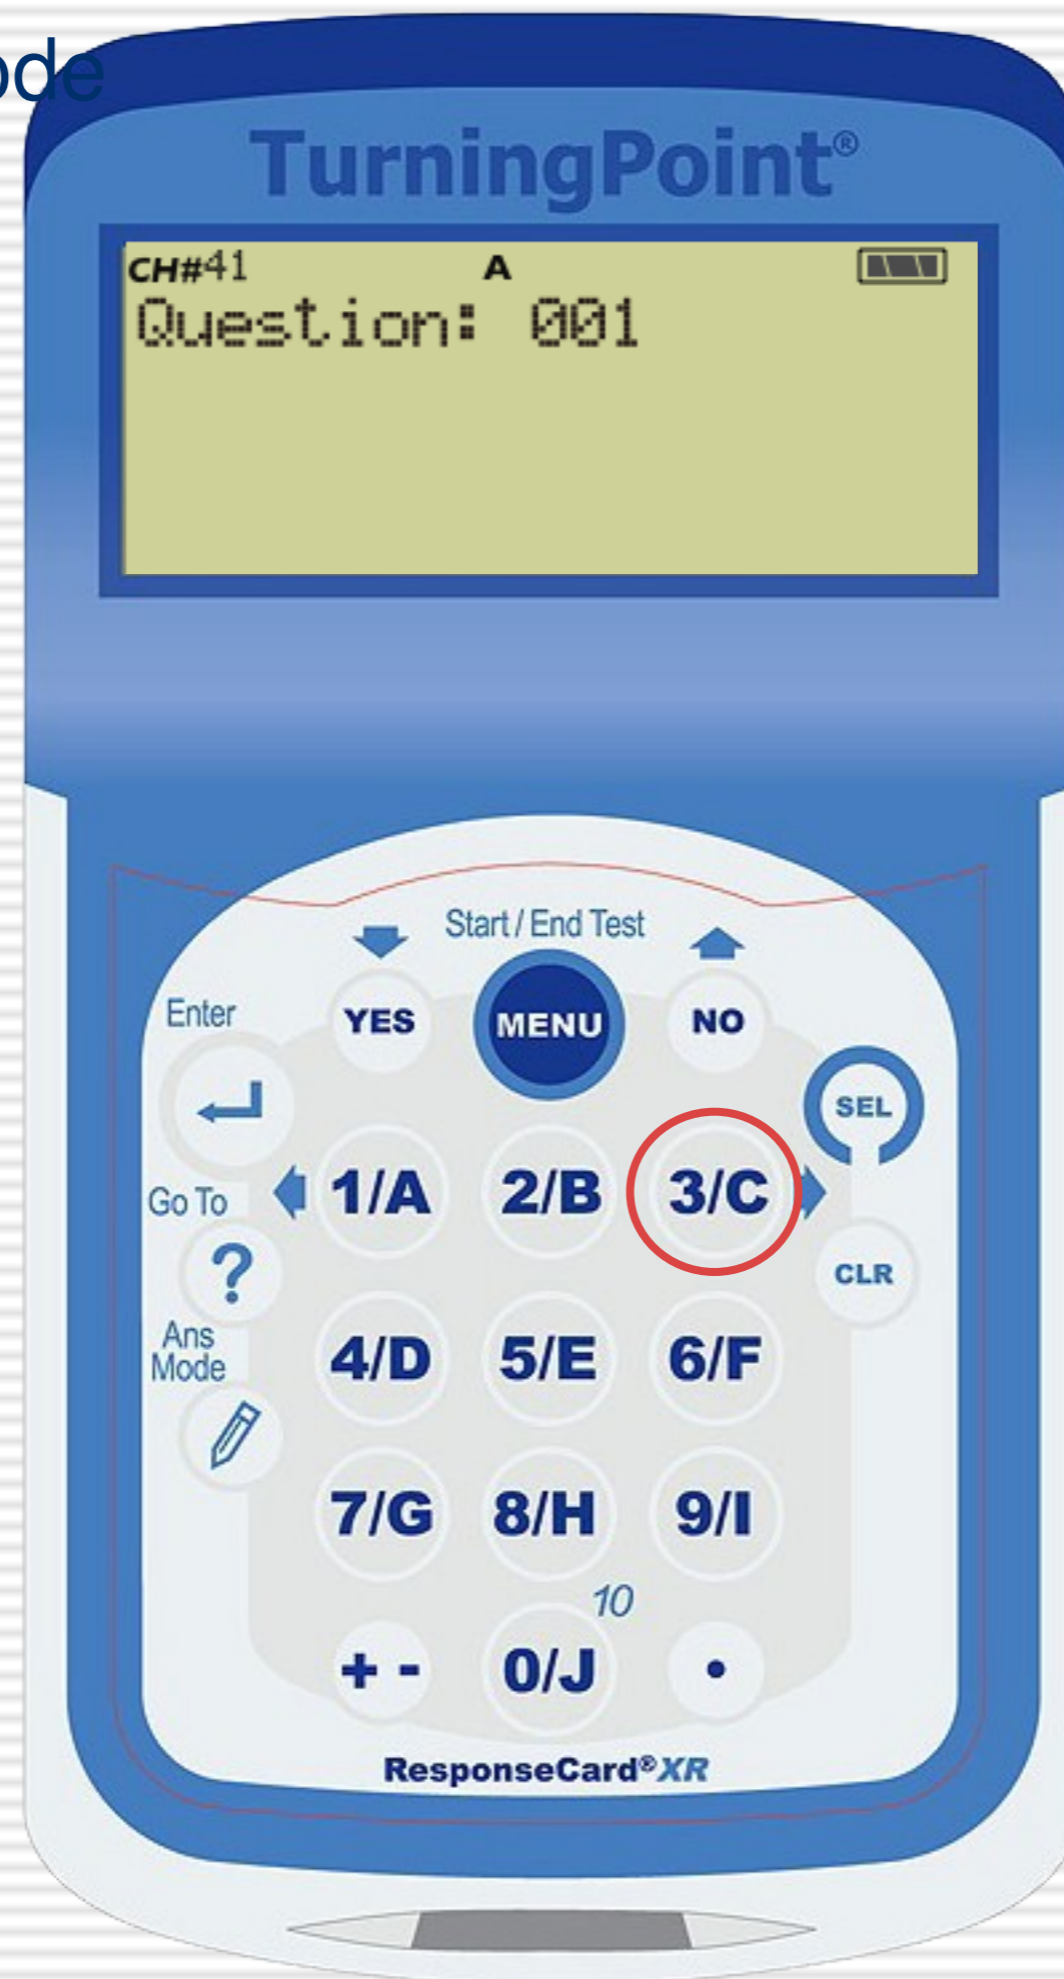

The question is answered by pressing one of the keys labeled A through J. You do not need to press Enter!

Pressing Ans Mode again will toggle back to the default multiple choice mode.

Answering Single Mode

If the answer to a multiple choice question is C, then make sure you are in single letter mode and press the C key.

Answering Single Mode

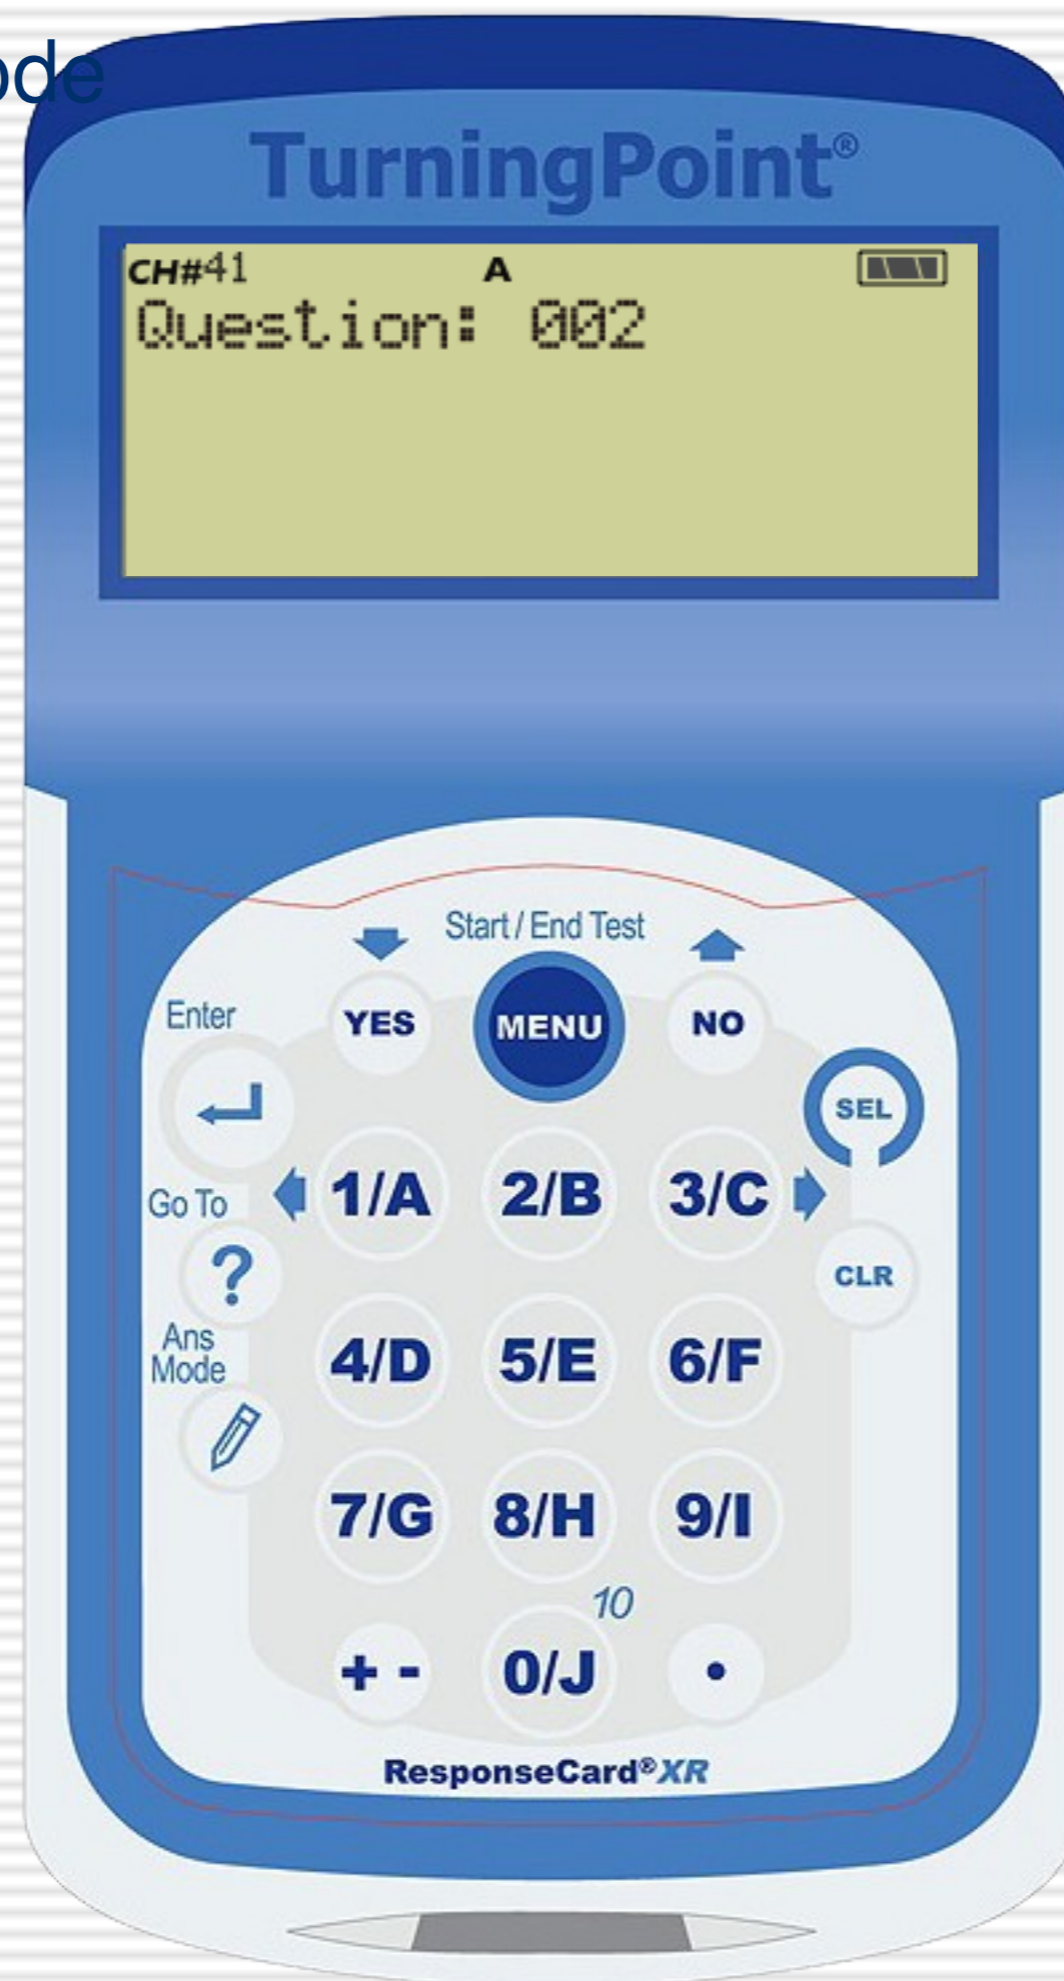

You will see the answer, followed by the indication that the keypad is storing the data

(The single entry mode for numbers is the same)

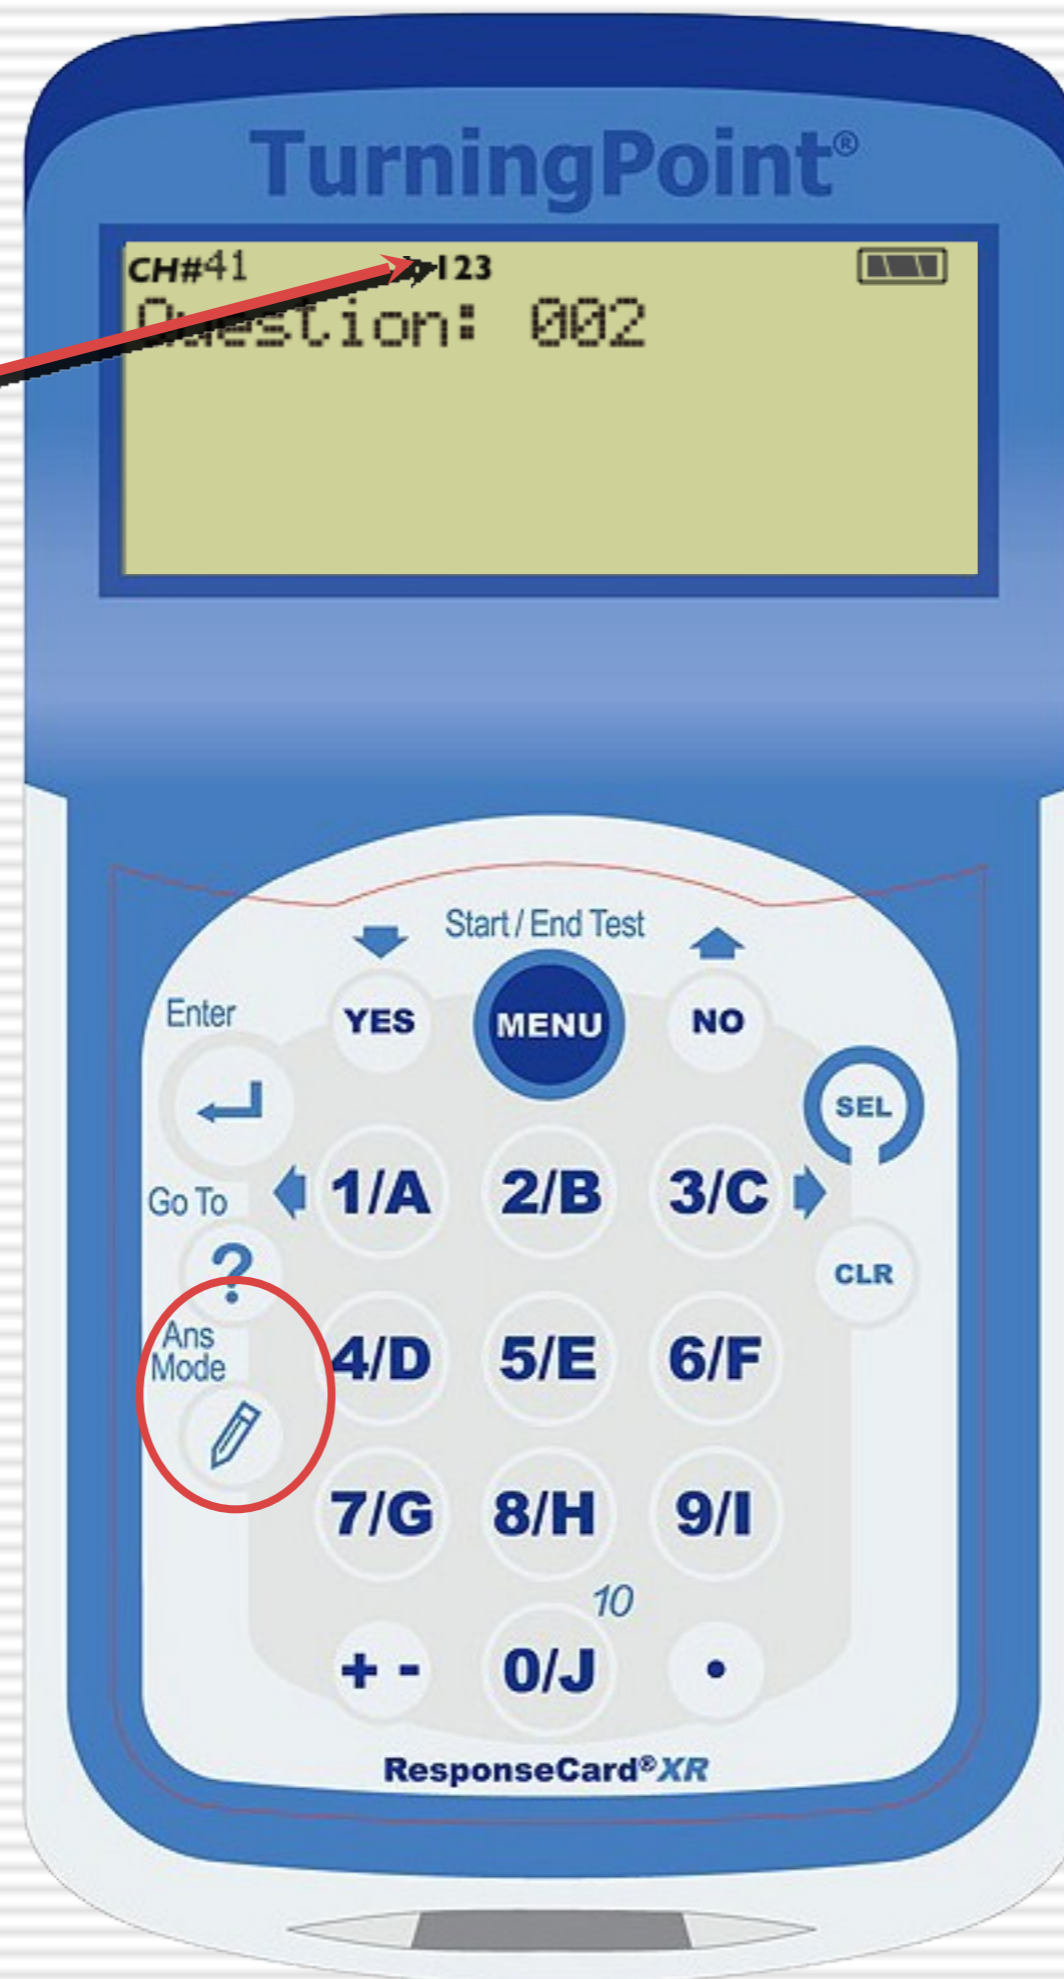

Answering Single Mode

Once the answer is stored, you are automatically advanced to the next question

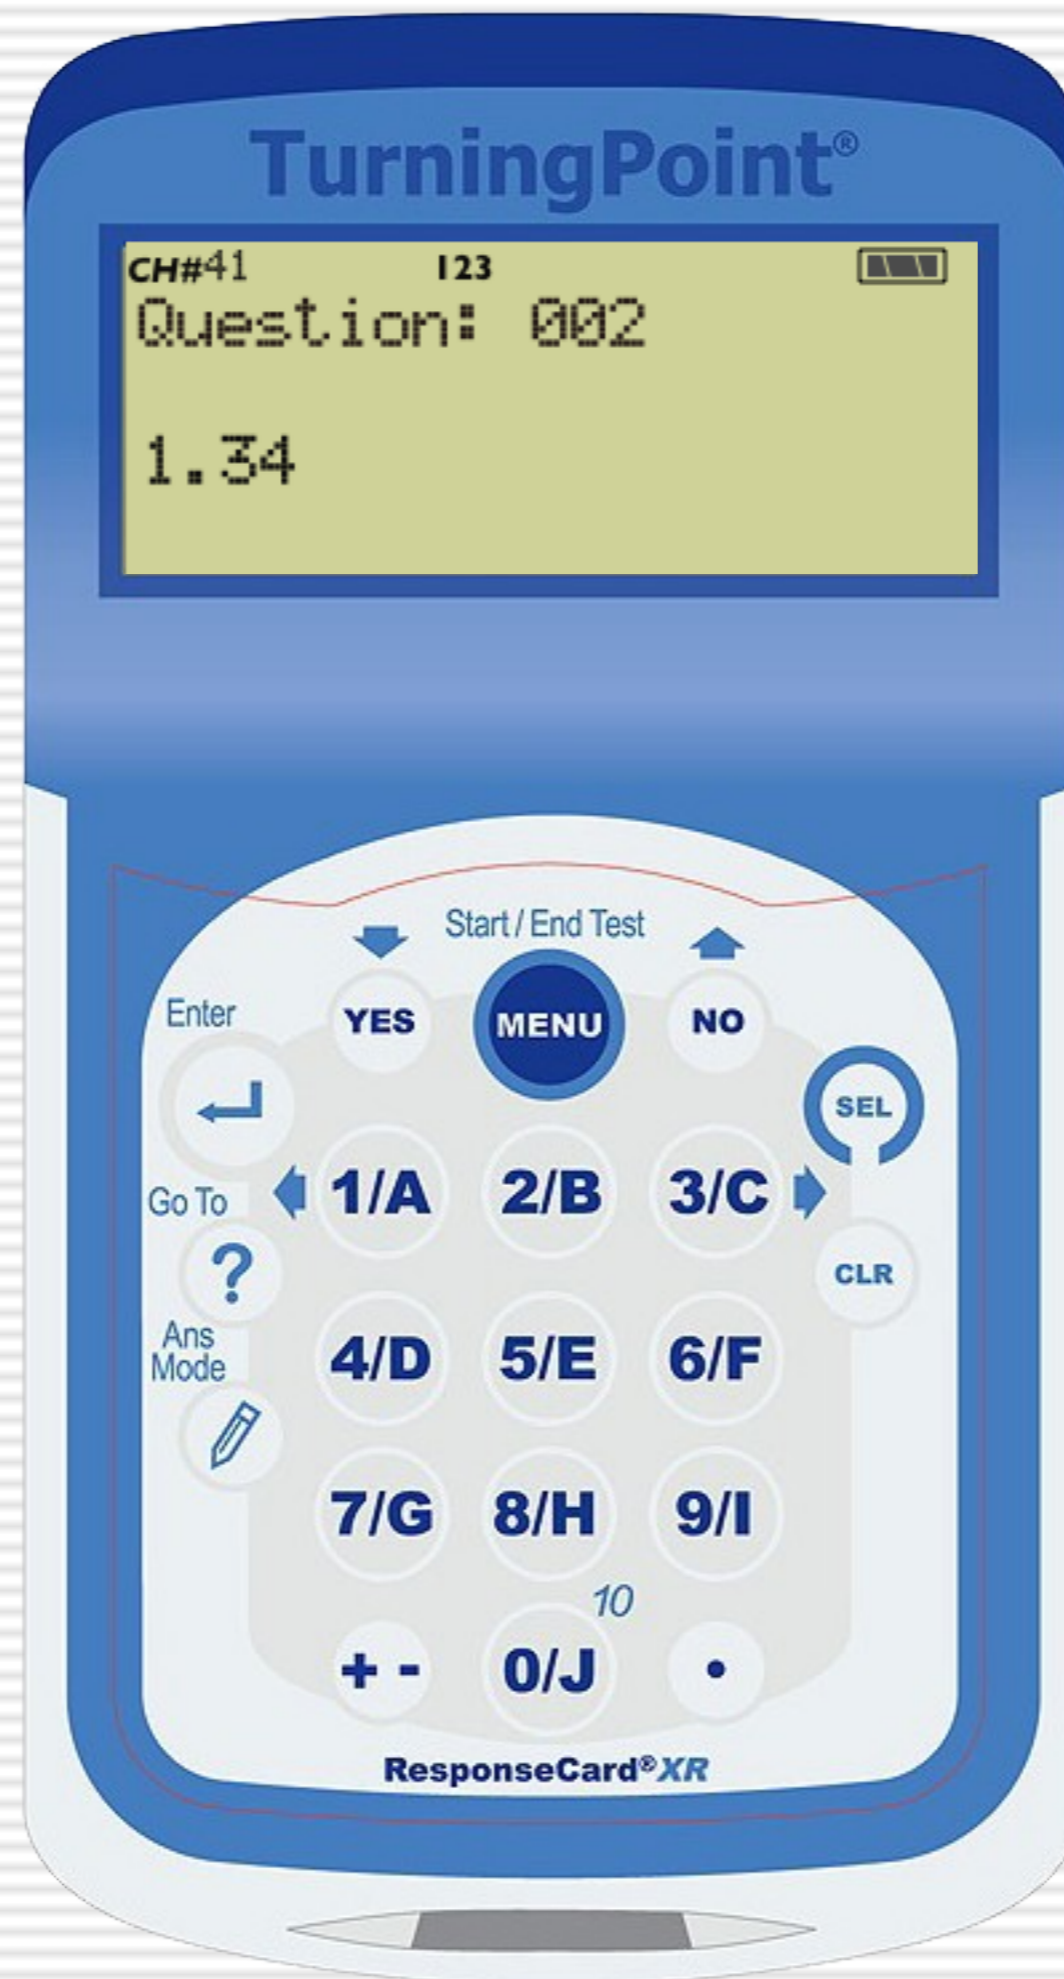

Answering Numeric

If the next question requires a numeric answer, then toggle to numeric answer mode

Answering Numeric

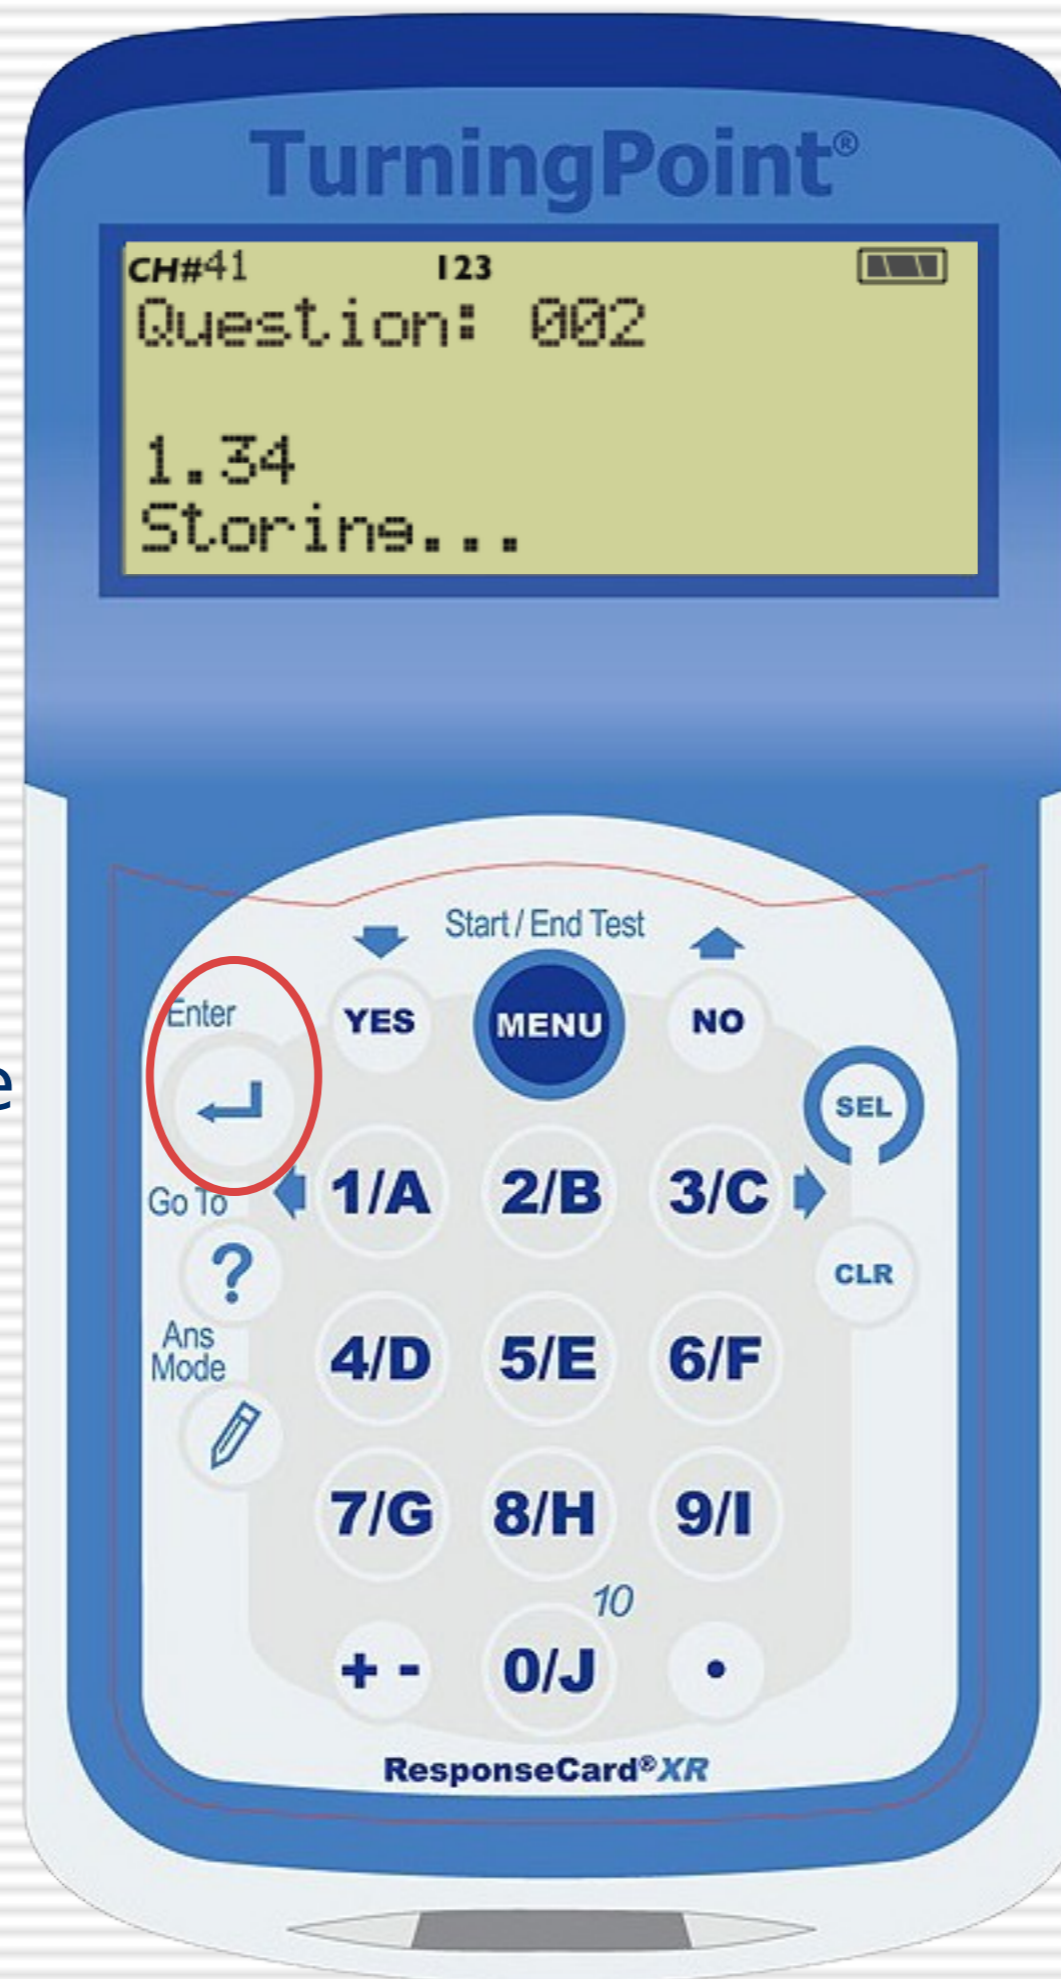

If the answer to the question is 1.34, then press those keys

Answering Numeric

Next, you must press the Enter key to accept this answer.

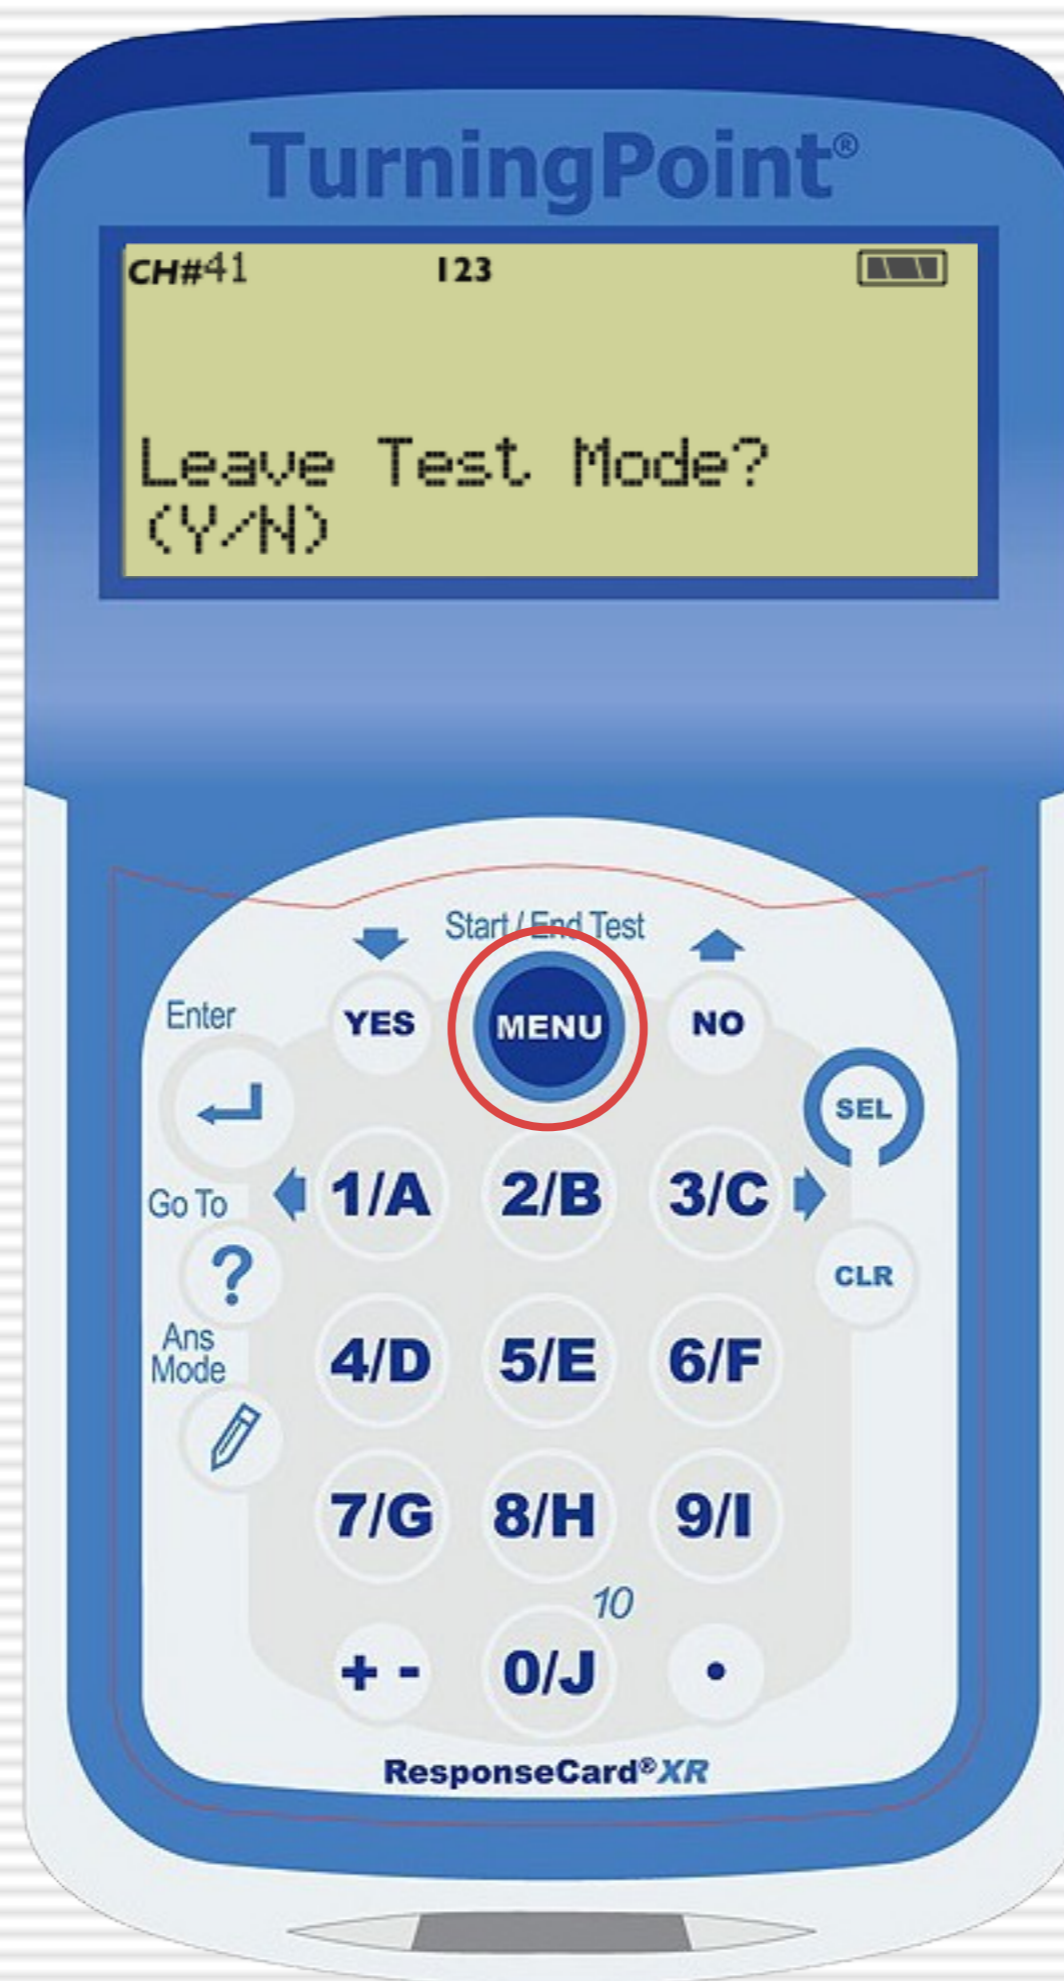

You will momentarily see the 'Storing...' message and the keypad will advance to the next question.

(The alphanumeric mode is the same.)

Finishing the test

When you are done with the entire assignment, press the MENU button, also labeled Start/End Test. Then press YES

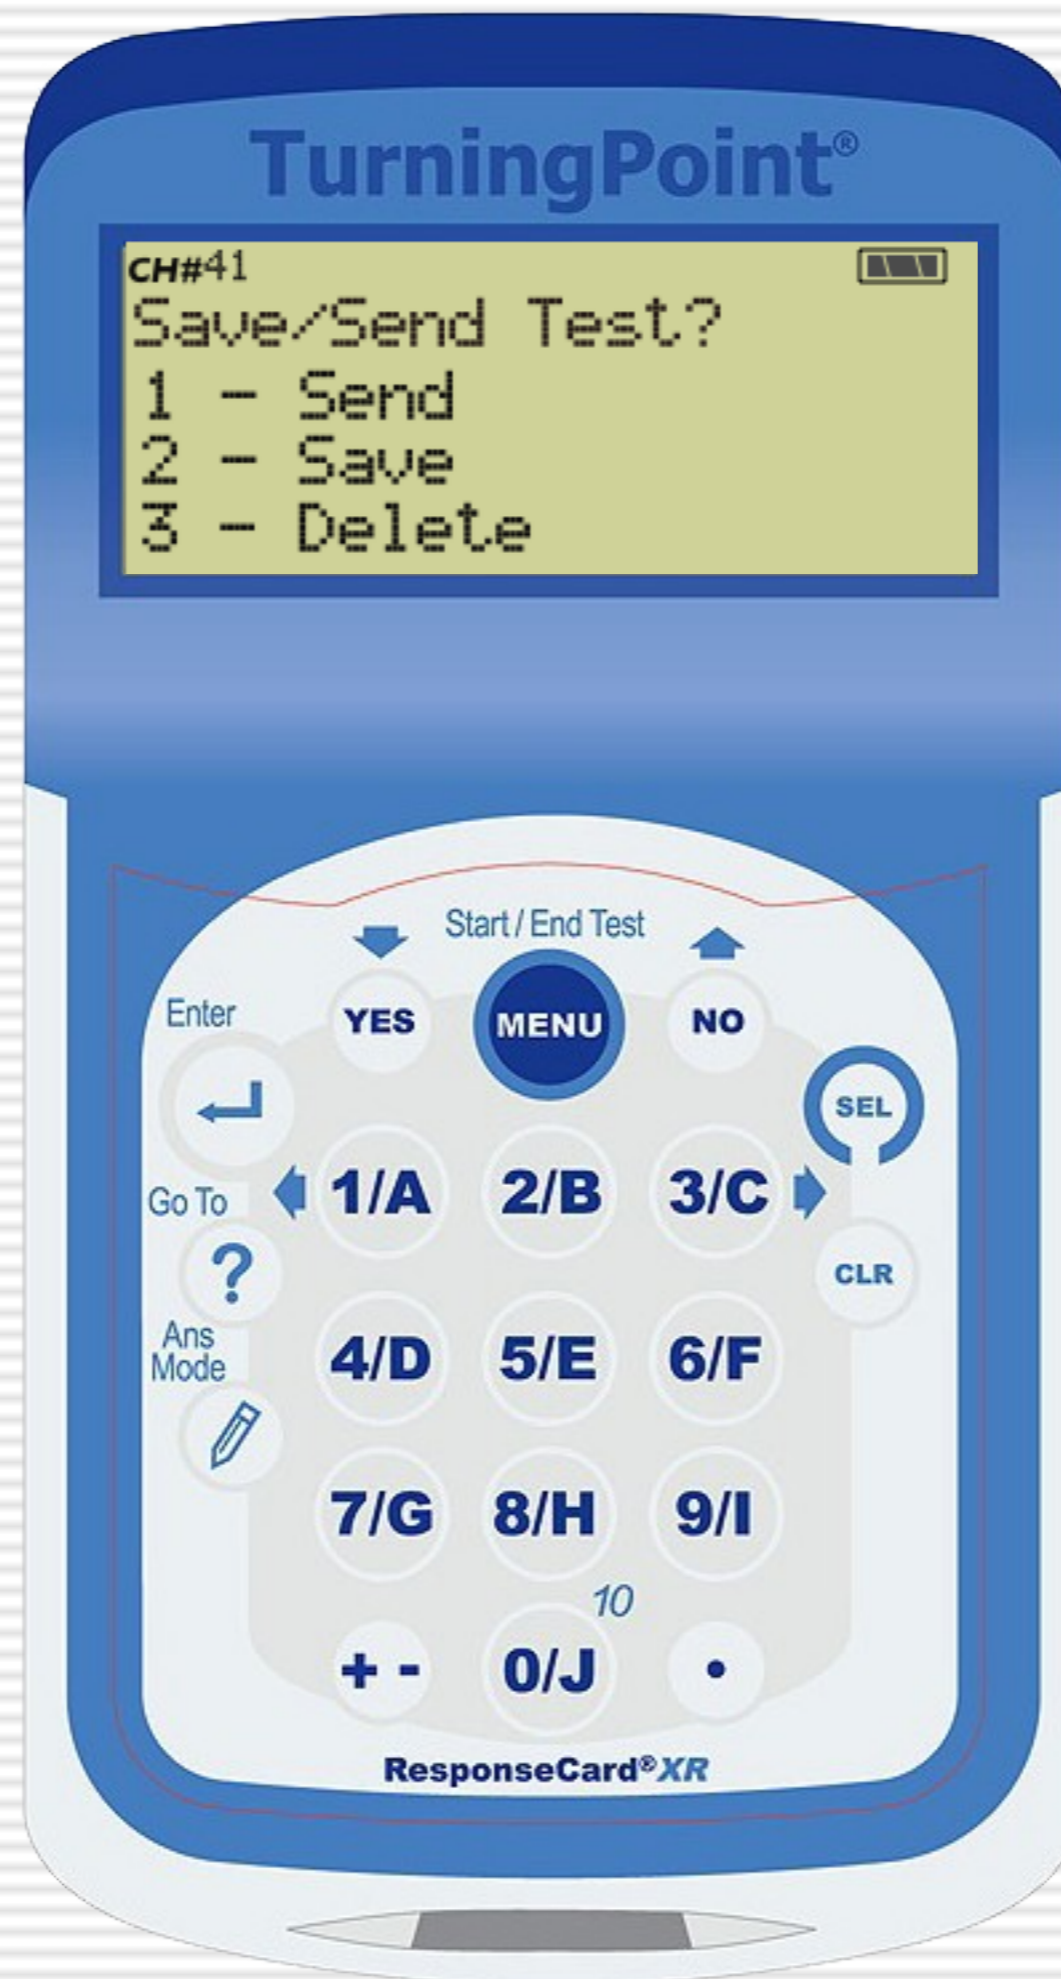

Save or Send?

After finishing the test, you can:

1. Immediately upload the test to the receiver if instructed to do so.

2. Save the data for later (if you're doing homework and not in class)

3. Forget the whole thing and delete all of the work you just did!

Saved Test

If you have chosen to save the test, you will receive the message that the Test was saved successfully.
